ARAW

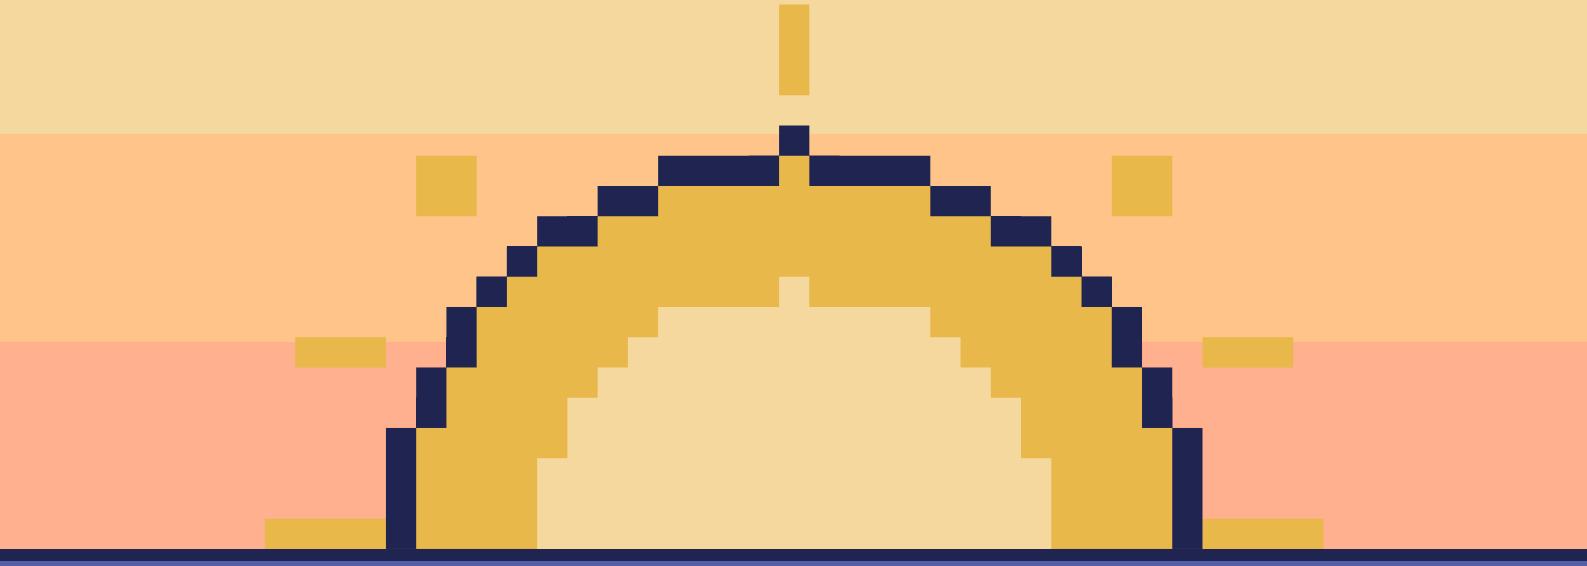

ARAW: AI Relevance Activities and Workshops

USER GUIDE

Version 1.1 (2026-11)

Learn when to trust AI and health info, one fun game at a time.

AN AIKASALIG PROJECT

AN AIKASALIG PROJECT · DOST-PCHRD · NATIONAL UNIVERSITY

★ **Quick-start sheet (to photocopy)** 48

HOW TO READ THE PICTURES

1 A number on a picture points at a button or a part of the screen. The note with the same number tells you what it does.

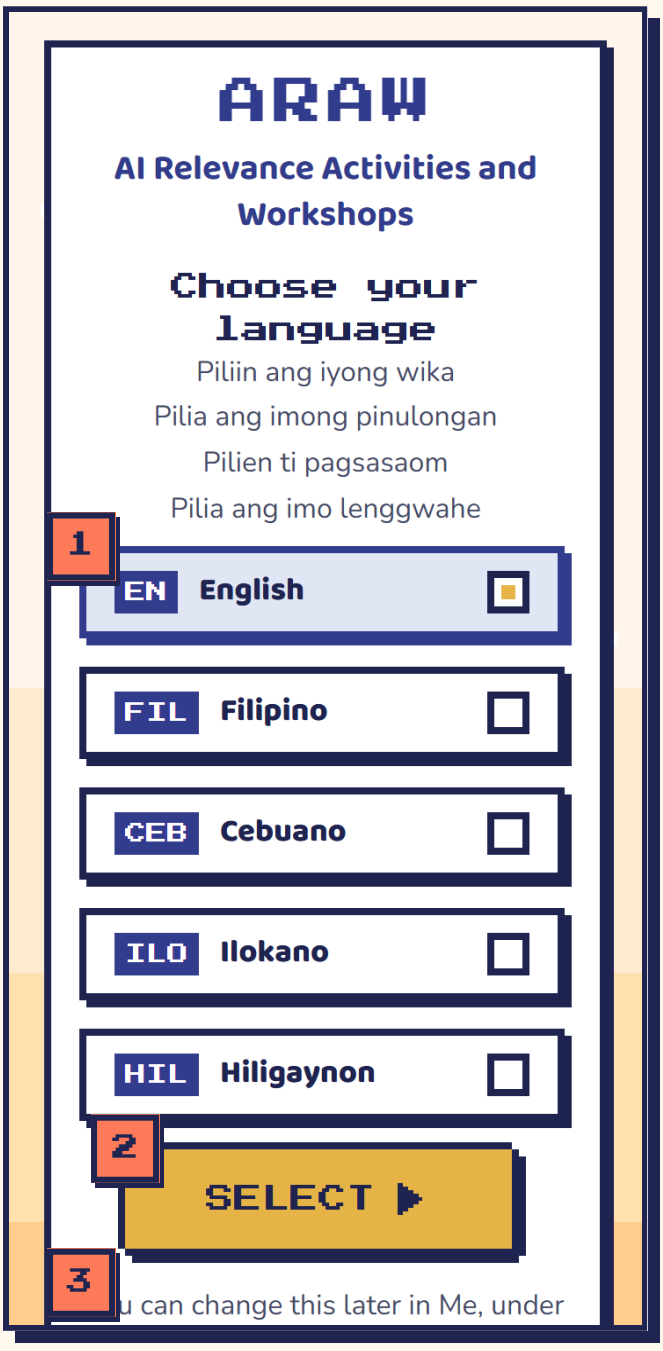

1 · START

Getting started

ARAW works in the web browser of any phone, tablet or computer. You do not need an account.

1 Choose your language

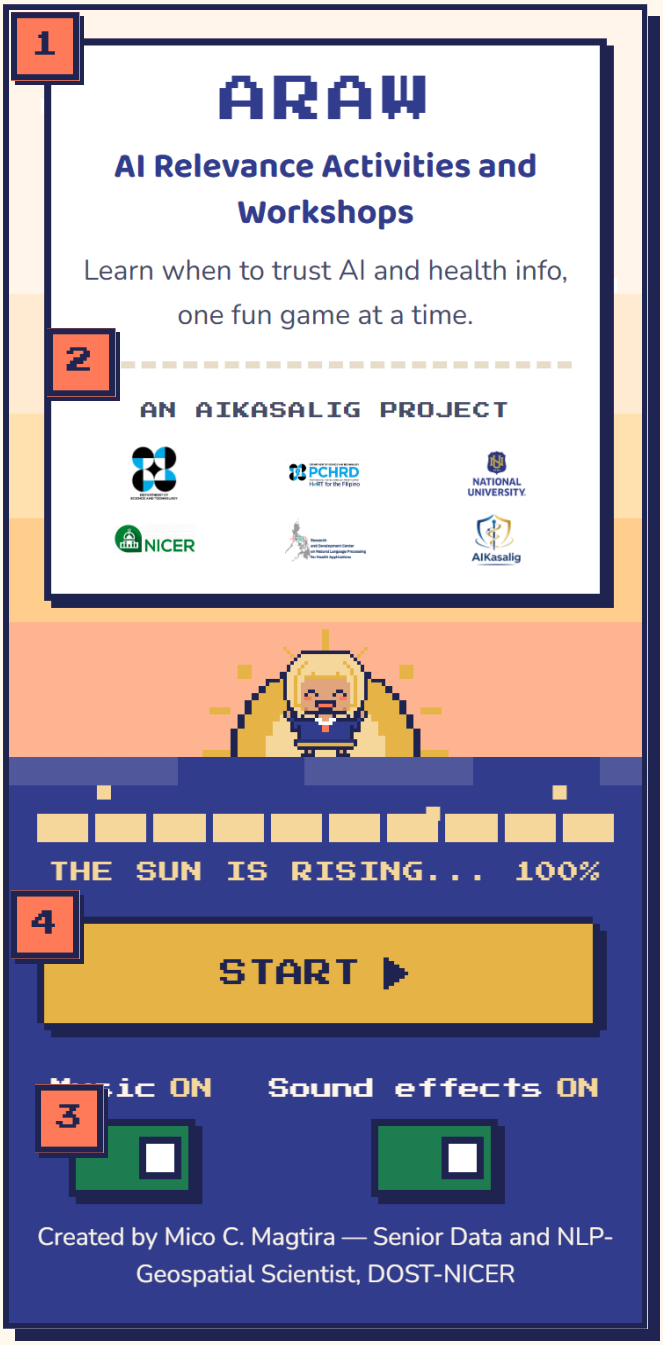

The very first screen asks for your language. ARAW speaks English, Filipino, Cebuano, Ilokano and Hiligaynon. Tap a language card, then press SELECT.

1. Tap your language. The picked card turns blue and its little box fills in.
2. Press SELECT. The music starts and the sun begins to rise.
3. You can change the language later in Me, under Settings.

2 Wait for the sunrise, then press START

Next, the sun rises behind Ara and the loading bar fills. When the bar is full, press START.

1. The name of the app and what it is for.
2. ARAW is an AIKasalig project. These are the project partners: DOST, DOST-PCHRD, National University, NICER and AIKasalig.
3. Sound switches. Turn music or sound effects on or off before you start.
4. Press START to go to the Home screen.

3 Turn sound on or off

ARAW has soft music and small sound effects. You can turn each one off at any time. Your choice is saved on this device.

1. On the start screen, use the Music and Sound effects switches.
2. Later, open Me and scroll to Sound to change them again.
3. In a quiet room or a group session, turn the music off and keep the effects low.

4 Install ARAW on your phone

You can add ARAW to your home screen like an app. After the first visit it also works without internet.

1. Android (Chrome): tap the three dots at the top right, then "Add to Home screen" or "Install app".
2. iPhone (Safari): tap the Share button, then "Add to Home Screen".
3. Computer (Chrome or Edge): click the install icon at the right end of the address bar.
4. Open ARAW from the new icon. It opens full screen.

> **Tip:** Your progress stays on this device only. If you clear the browser data, your progress is cleared too.

2 · HOME

The Home screen

Home shows what to do next. Use the buttons at the bottom (on a phone) or on the left (on a computer) to move around.

1 The ARAW banner

The top of Home shows what ARAW is and who made it. New here? Watch the one-minute tour first.

1. ARAW: AI Relevance Activities and Workshops, an AIKasalig project.
2. Watch a one-minute video tour of the app, with captions.
3. The project partners.
4. Read about the project, its partners and the team.

2 See your next lesson

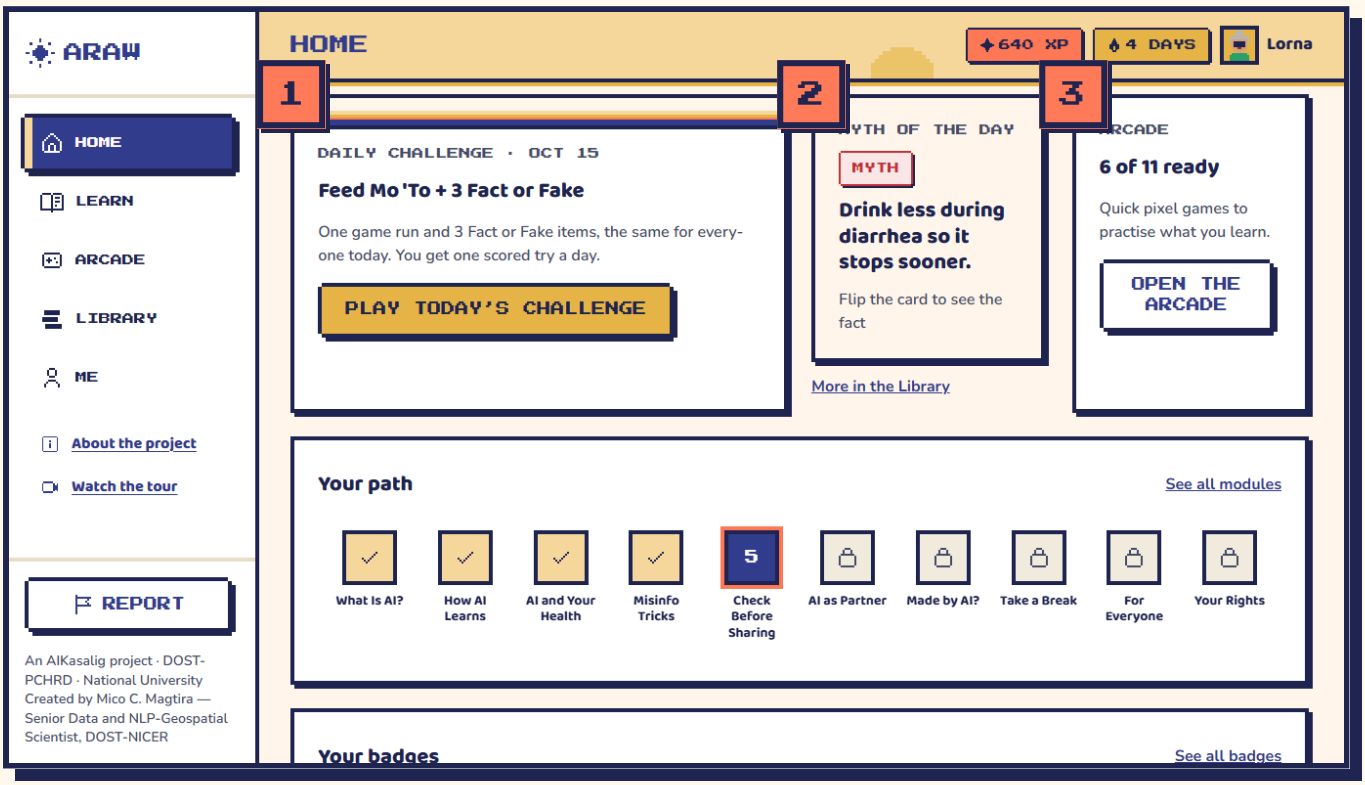

Ara greets you and shows the next lesson. Press CONTINUE to keep learning where you stopped.

1. Your points (XP) and your streak: how many days in a row you have played.
2. How much of this lesson you have done.
3. Continue the lesson.
4. Report a problem from any screen.
5. Go to Home, Learn, Arcade, Library or Me.

3 More on Home

Scroll down for the Daily Challenge, a myth of the day and the Arcade.

1 Today's challenge: one game and three quick questions.

2 Myth of the day. Tap the card to flip it and read the fact.

3 A shortcut to the games.

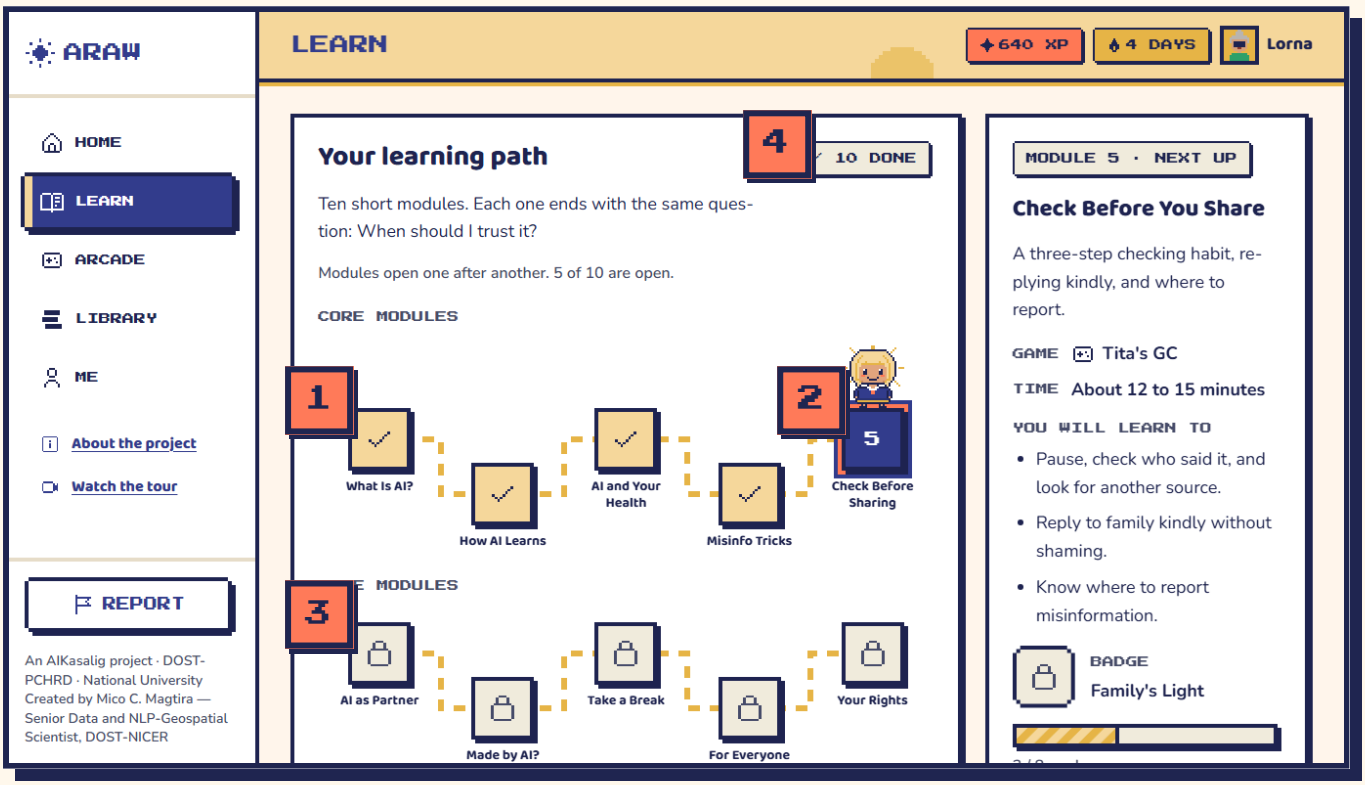

3 · LEARN

Learn: lessons step by step

There are ten short modules. Each takes about 12 to 15 minutes and ends with the same question: when should I trust it?

1 Your learning path

Modules open one after another. A check mark means done. A lock means you finish the one before it first.

1 A finished module. You can replay it any time.

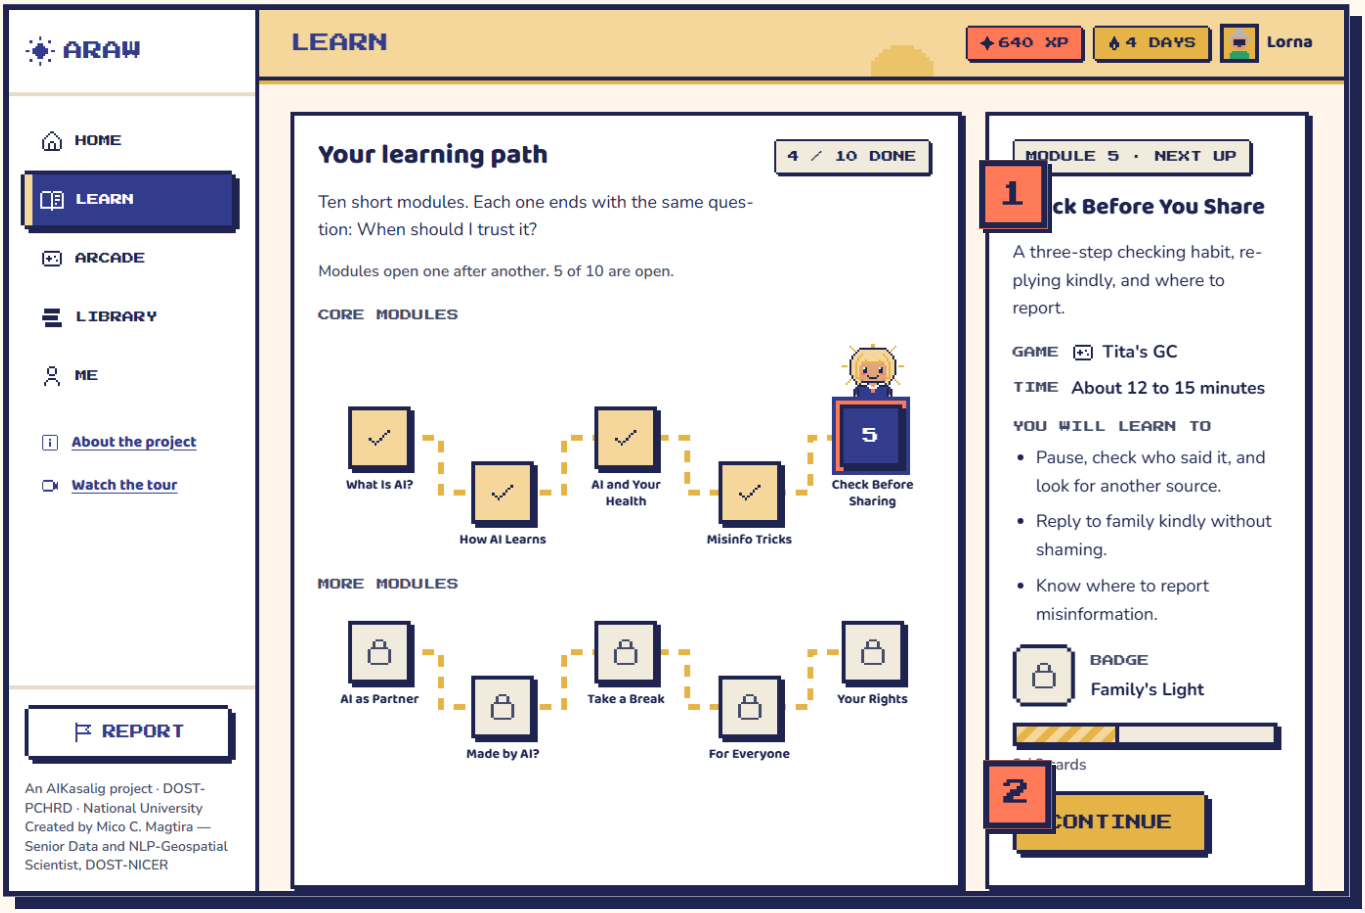

2 Your next module. Ara stands on it.

3 A locked module. Finish the one before it to open it.

4 How many modules you have finished.

2 Open a module

Tap a module to see what it teaches, how long it takes and the badge you can earn. Then press START or CONTINUE.

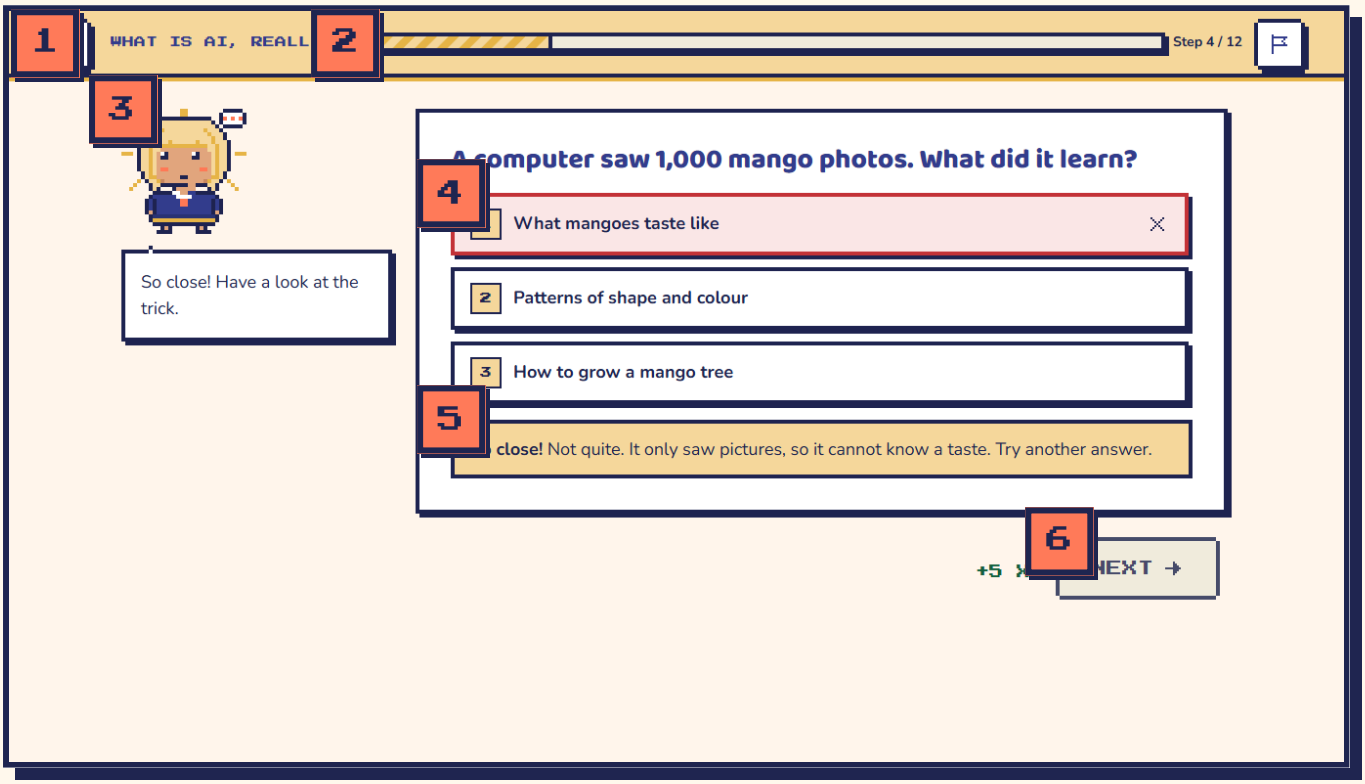

1 The module name and what you will learn.

2 Start or continue the module.

3 Answer a lesson card

Read the card and tap an answer. If it is not right, ARAW says "So close!" and explains why. Then try another answer. No one loses points for trying.

> **Tip:** On a computer you can press the number keys to pick an answer, and Enter for NEXT.

1. Close the lesson. Your place is saved.
2. How far you are in this module.
3. Ara reacts to your answer and gives a hint.
4. The answer you picked.
5. "So close!" tells you why, so you can try again.
6. NEXT opens when the card is done.

4 Rewards and badges

Each finished module gives you XP and a badge. Ara celebrates with you. See all your badges in Me, in the Badge cabinet.

1 Tap a badge to see how to earn it.

4 · FACT OR FAKE

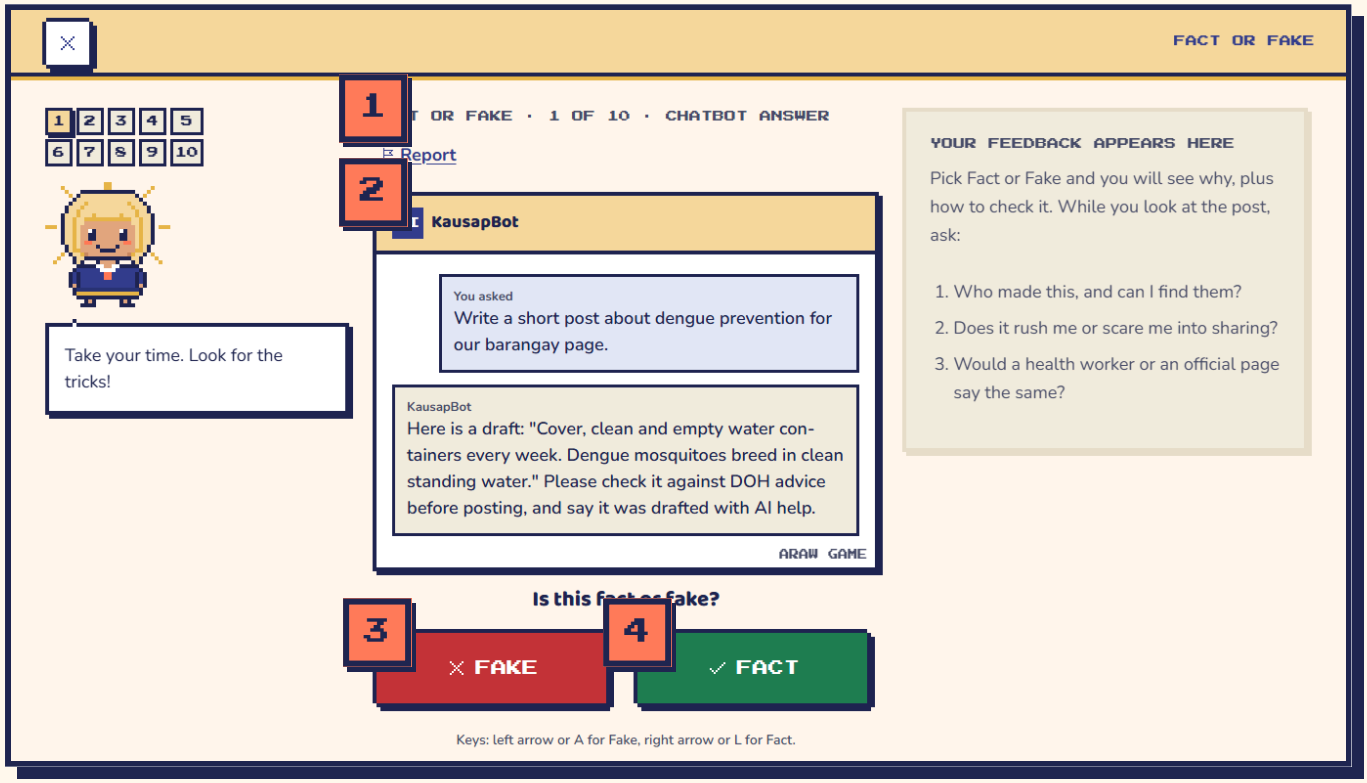

Fact or Fake and the Truth Radar

Fact or Fake shows ten posts, messages or pictures. You decide: is it fact or fake? Every fake is made up for the game and gets a FAKE stamp.

1 Decide: fact or fake?

Read the post. Then press FACT or FAKE. On a phone you can also swipe: right for fact, left for fake.

> **Tip:** Keyboard: right arrow or L for Fact, left arrow or A for Fake.

1 Which item you are on, out of ten.

2 The post to check. Read it slowly.

3 Press FAKE if you think it is false.

4 Press FACT if you think it is true.

2 Read the feedback

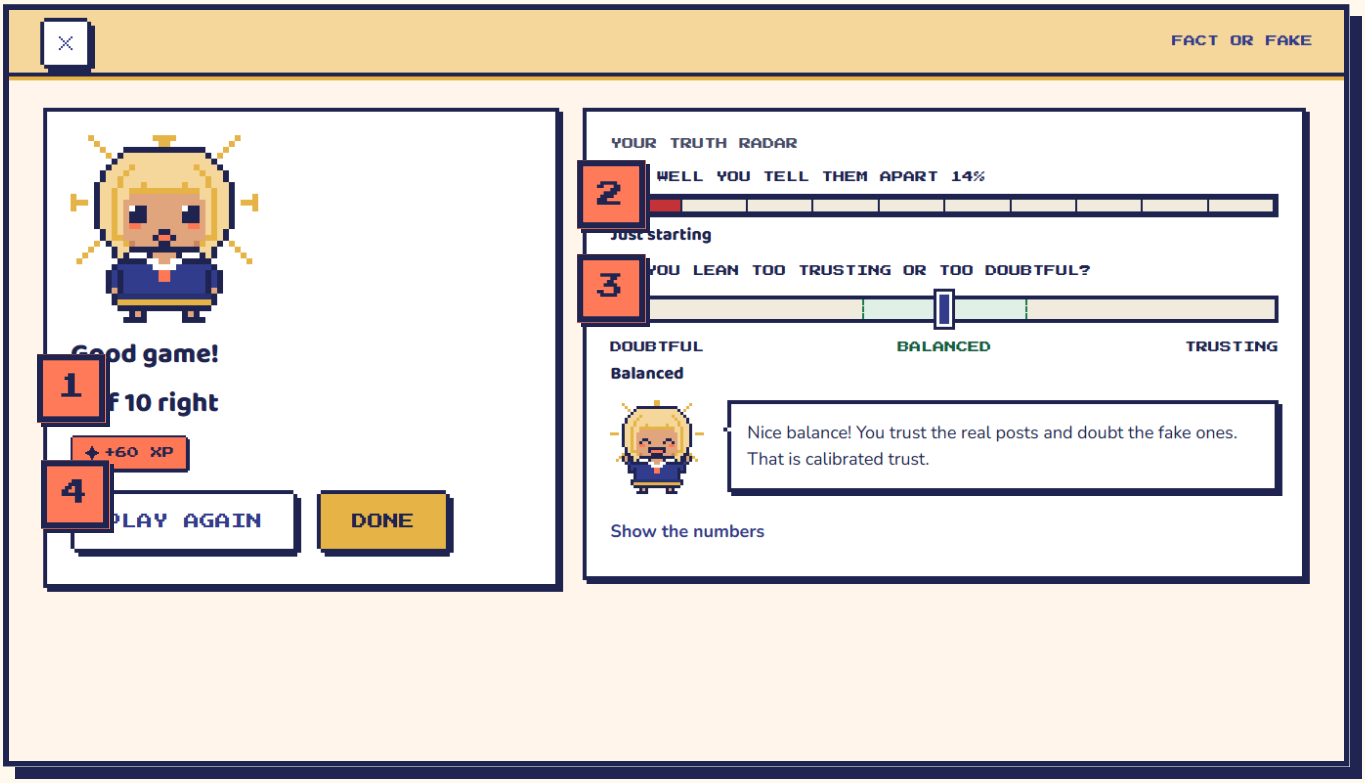

After each answer, a card tells you if you were right, why, and how to check it in real life.

1. The FAKE stamp shows the post was made up for the game.
2. Why it is fact or fake, and how to check.
3. Report this item if something looks wrong.
4. Go to the next item.

3 Your Truth Radar

At the end you see your score and your Truth Radar. The radar shows whether you lean too trusting, too doubtful, or balanced. Balanced is the goal.

1. How many you got right, and the XP you earned.
2. The Truth Radar: how well you tell fact from fake.
3. Do you lean trusting, doubtful, or balanced? A tip follows.
4. Play another round with new items.

5 · ARCADE

Arcade games

The Arcade has short games about AI and health. Every run is different. Games open as you finish modules.

1 Pick a game

The top card shows today's featured game. Below are all the games. Tap one to see what it is about.

1 Today's featured game. Everyone plays the same run today.

2 A game tile with its topic and your best score.

3 Watch a short video of how the game is played.

2 Play Fact or Fake from the Arcade

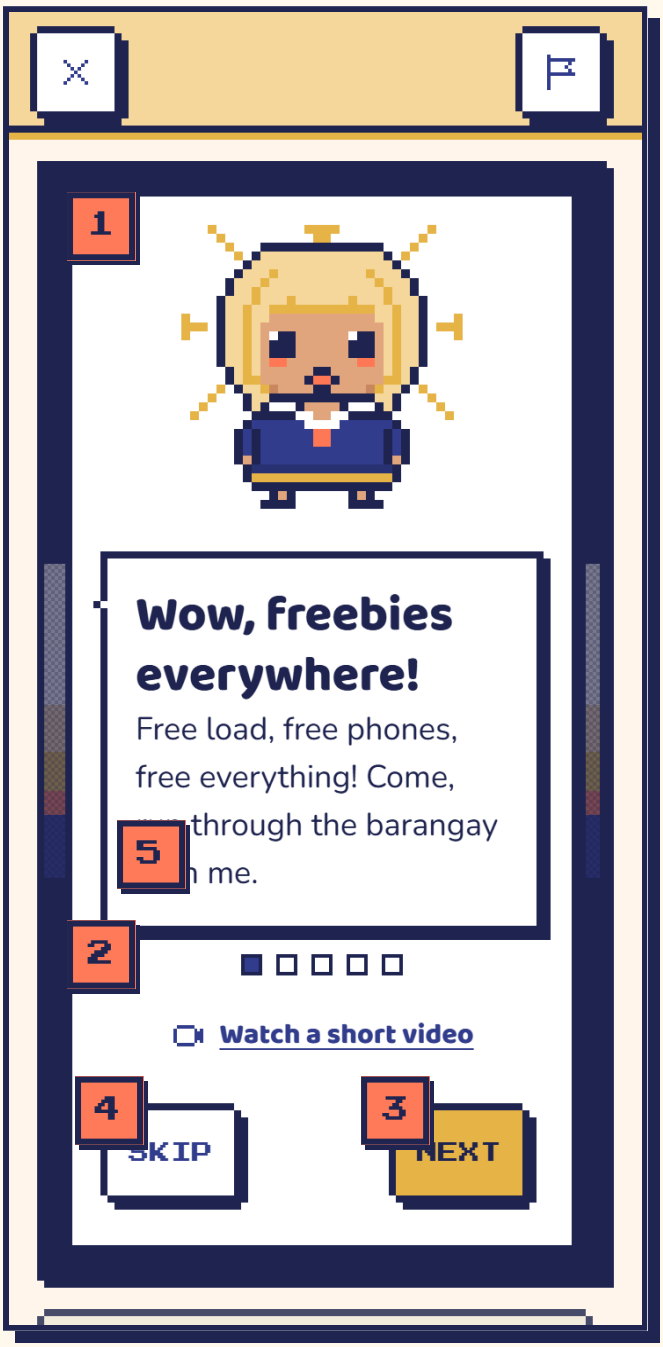

Scroll down in the Arcade to play Fact or Fake as often as you like.

1 Start a new round of ten items.

3 Ara's briefing

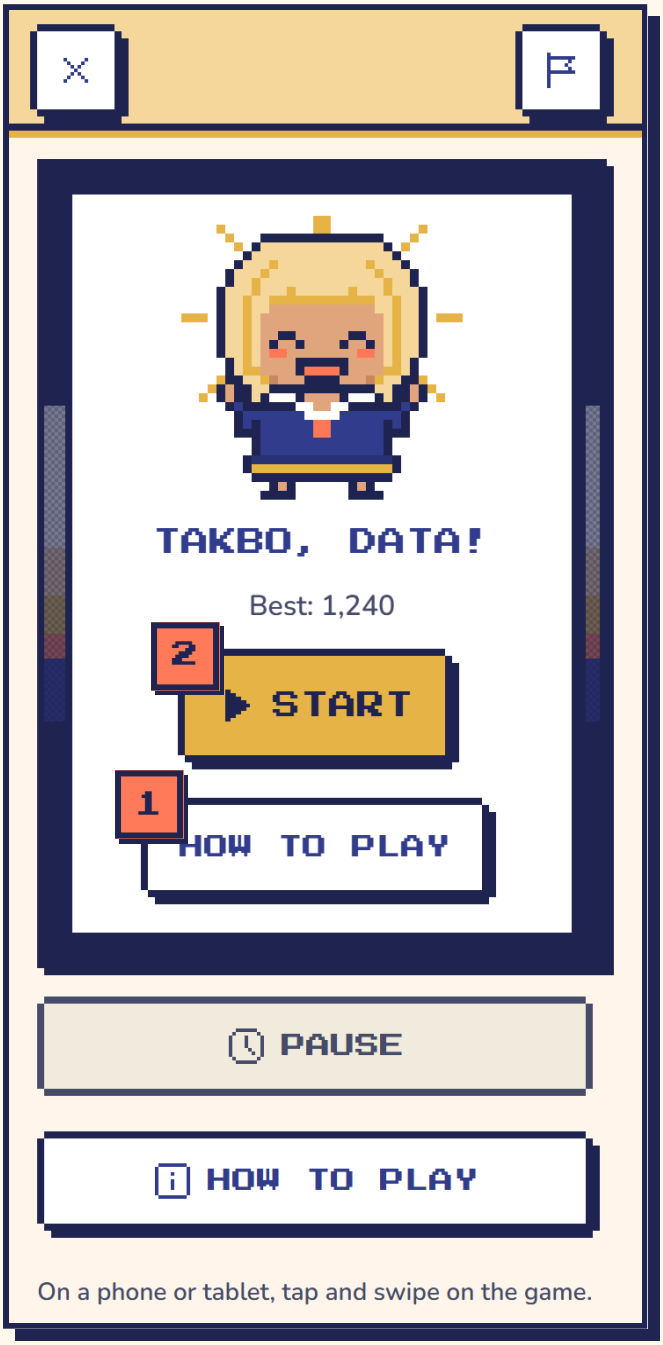

The first time you open a game, Ara explains it in five short pages. You can skip it and read it again later.

1. Ara explains the game in a few words.
2. Which page of the briefing you are on.
3. Go to the next page.
4. Skip the briefing.
5. Watch a short video of the game instead.

4 Start the game

Read How to play if you need a reminder. Then press START.

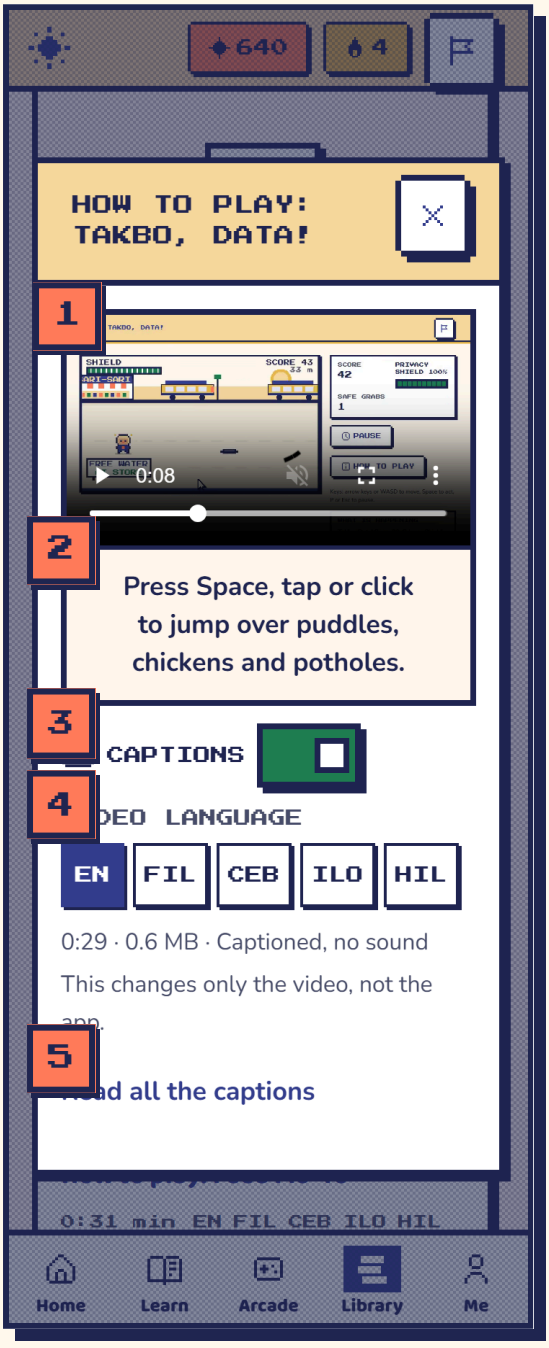

1. How to play: the controls and the goal.
2. Start playing.

5 Watch how to play

Every game has a short video that shows how it is played. Open it from How to play, the game details, or Library > Videos. The videos have no sound: read the captions under the picture.

> **Tip:** The videos play from the internet. They are not saved for offline use.

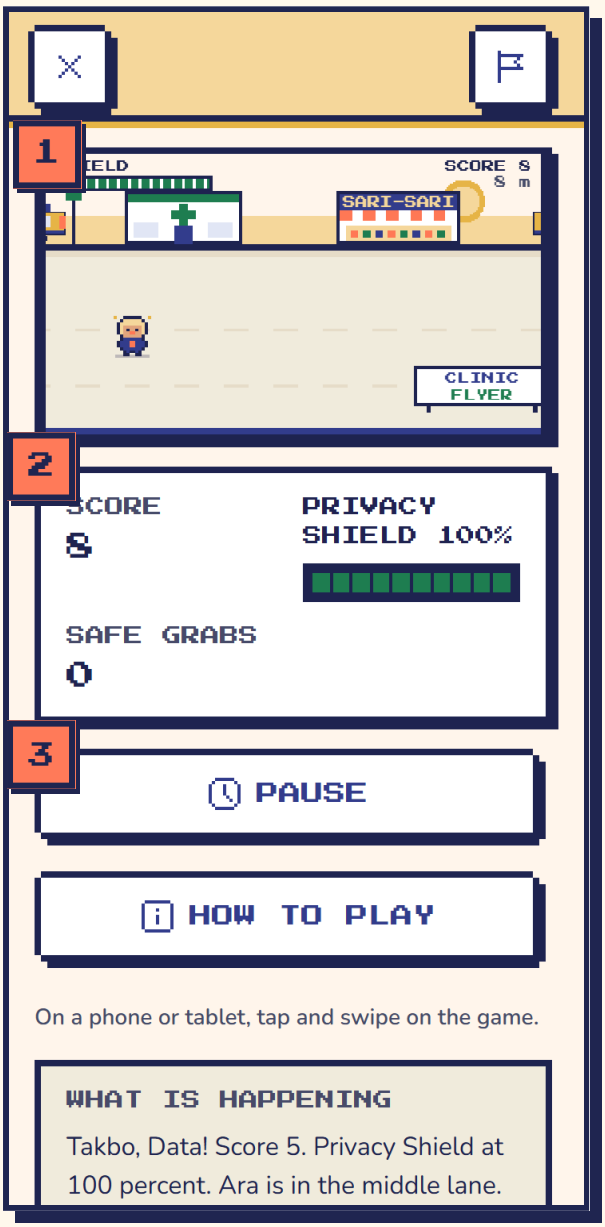

1. The video. Press play, or make it full screen.
2. The captions say what is happening.
3. Turn the captions on or off.
4. Watch the video in another language. This changes only the video, not the app.
5. Read all the captions at once.

6 Play with tap, mouse or keyboard

Every game works three ways. Use what is easiest for you. You can pause at any time.

1. Phone or tablet: tap or swipe on the game.
2. Computer with a mouse: click on the game.
3. Keyboard: arrow keys (or W A S D) to move, Space to act, P or Esc to pause.

> **Tip:** After a while Ara says "Pahinga muna!" and suggests a short break. Rest your eyes, then continue.

1. The game. Tap or click on it to play.
2. Your score and status.
3. Pause the game. P or Esc also pauses.

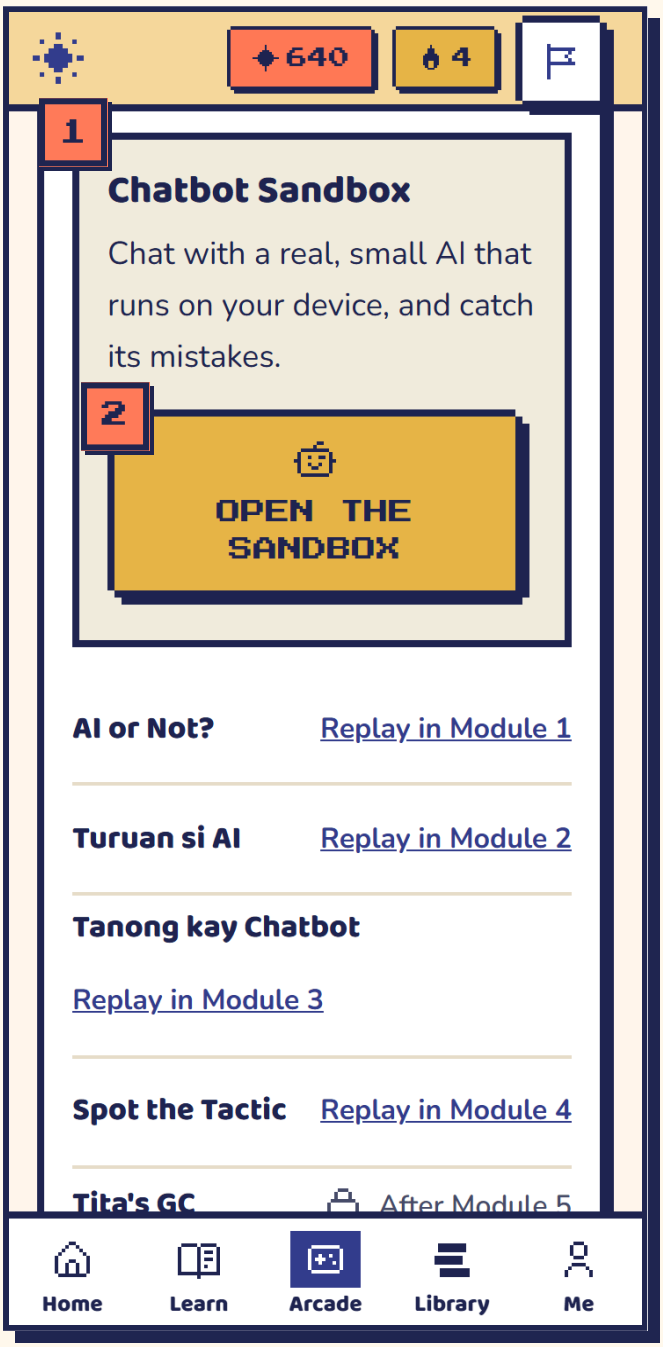

6 · SANDBOX

Chatbot Sandbox: practise with a real AI

The Chatbot Sandbox is a small practice AI that runs privately on your own device. It can be wrong, and that is the point: you practise catching its mistakes.

1 Open the sandbox

Open Arcade and look at the Practice part. Press Open the sandbox on the Chatbot Sandbox card.

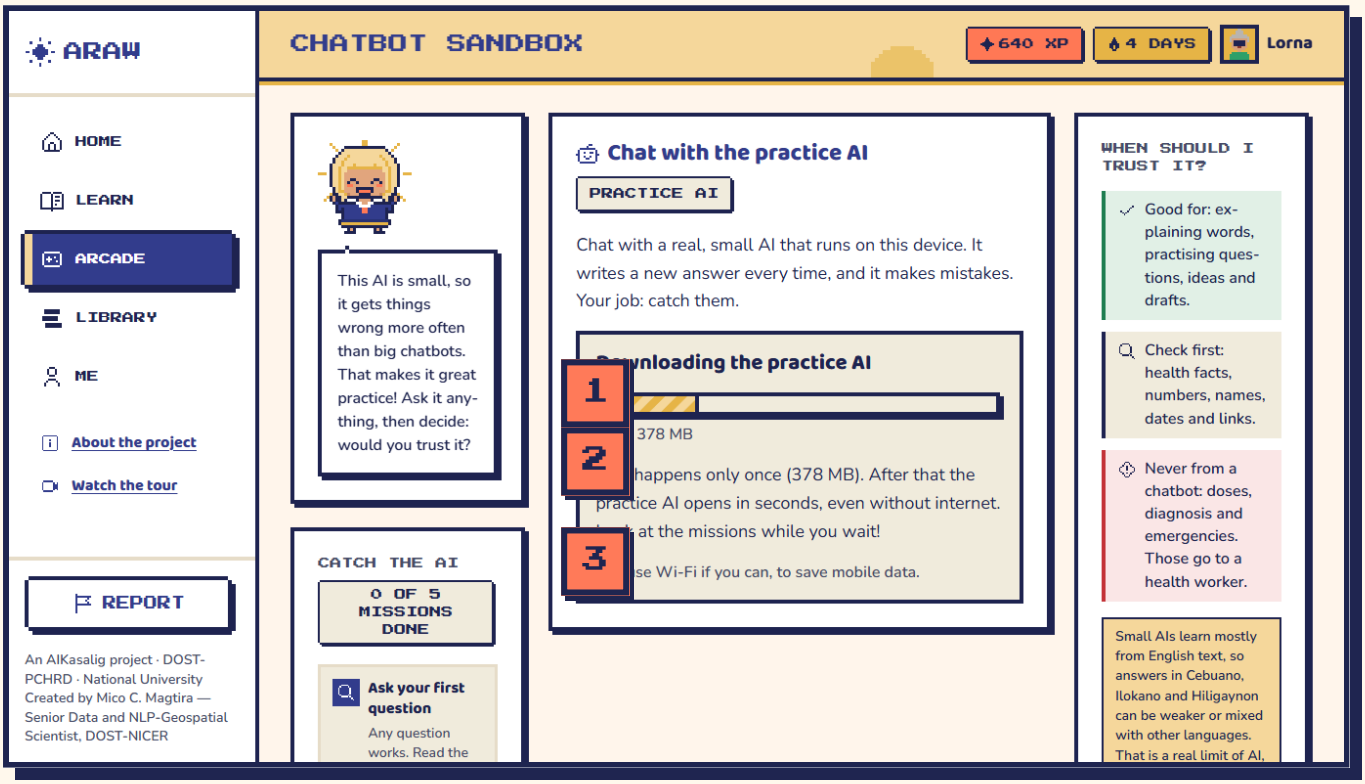

1 The Chatbot Sandbox card. It is a practice place, not a game with a score.

2 Press this to open the sandbox.

2 The one-time download

The practice AI is a file that is saved on your device. ARAW downloads it by itself, only once. After that it works without internet.

> **Tip:** If your device is too old or too small to run the practice AI, ARAW tells you kindly and shows Module 3 instead.

1 The progress bar. Wait until it is full.

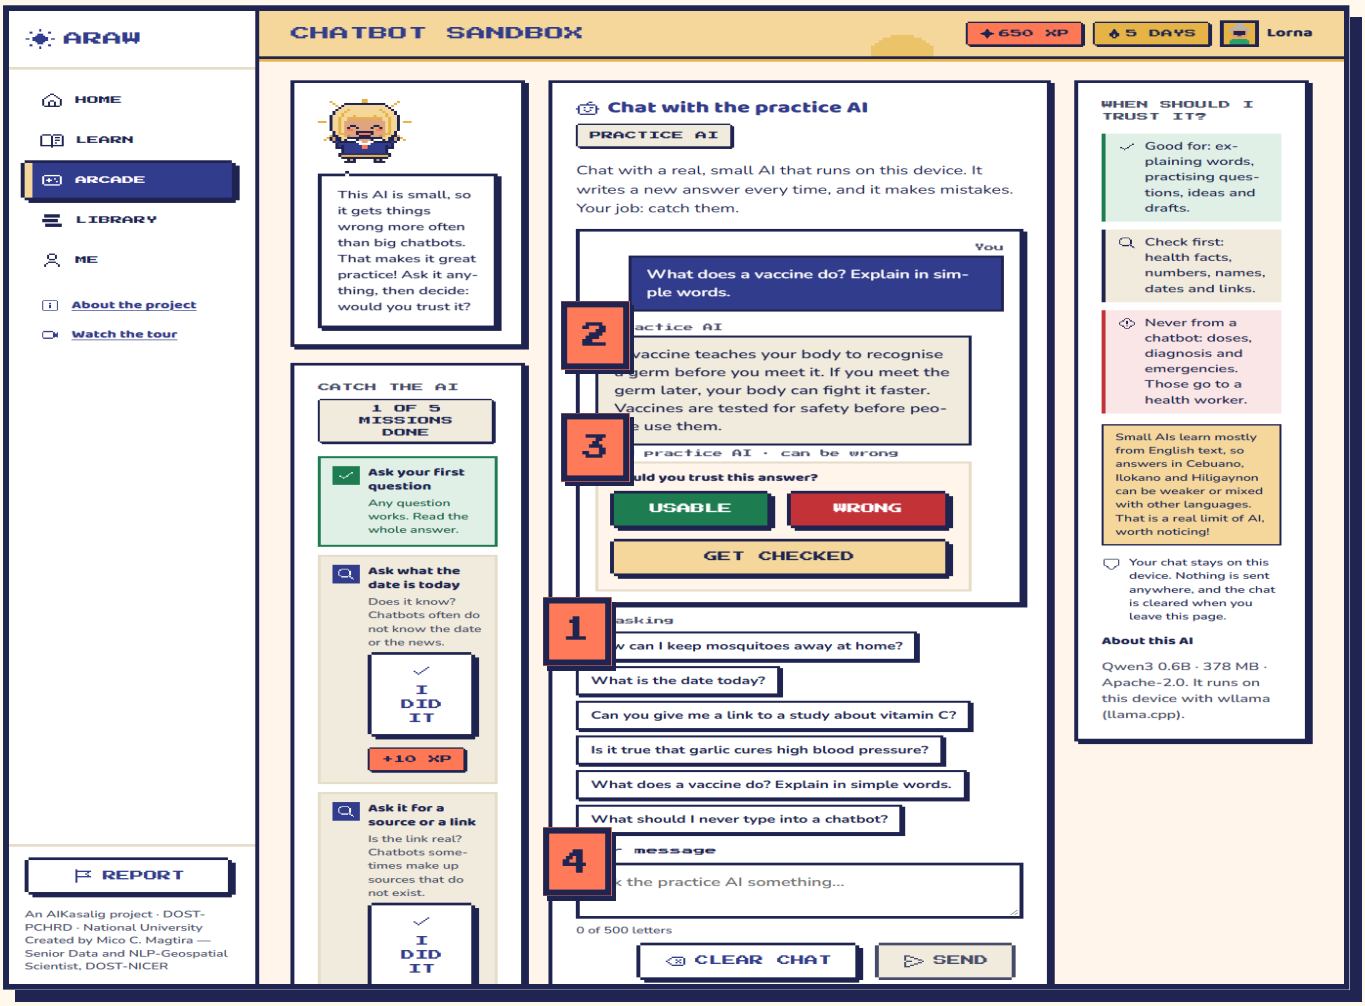

2 This happens only once.

3 Use Wi-Fi if you can, to save your mobile data.

3 Ask a question

Type a question and press Send, or tap one of the Try asking ideas. The answer appears word by word. Every answer says "ARAW practice AI · can be wrong".

> **Tip:** Your chat stays on this device. Nothing is sent anywhere, and the chat is cleared when you leave the page. Do not write names, ID numbers or addresses.

1 Try asking: tap an idea to ask it for you.

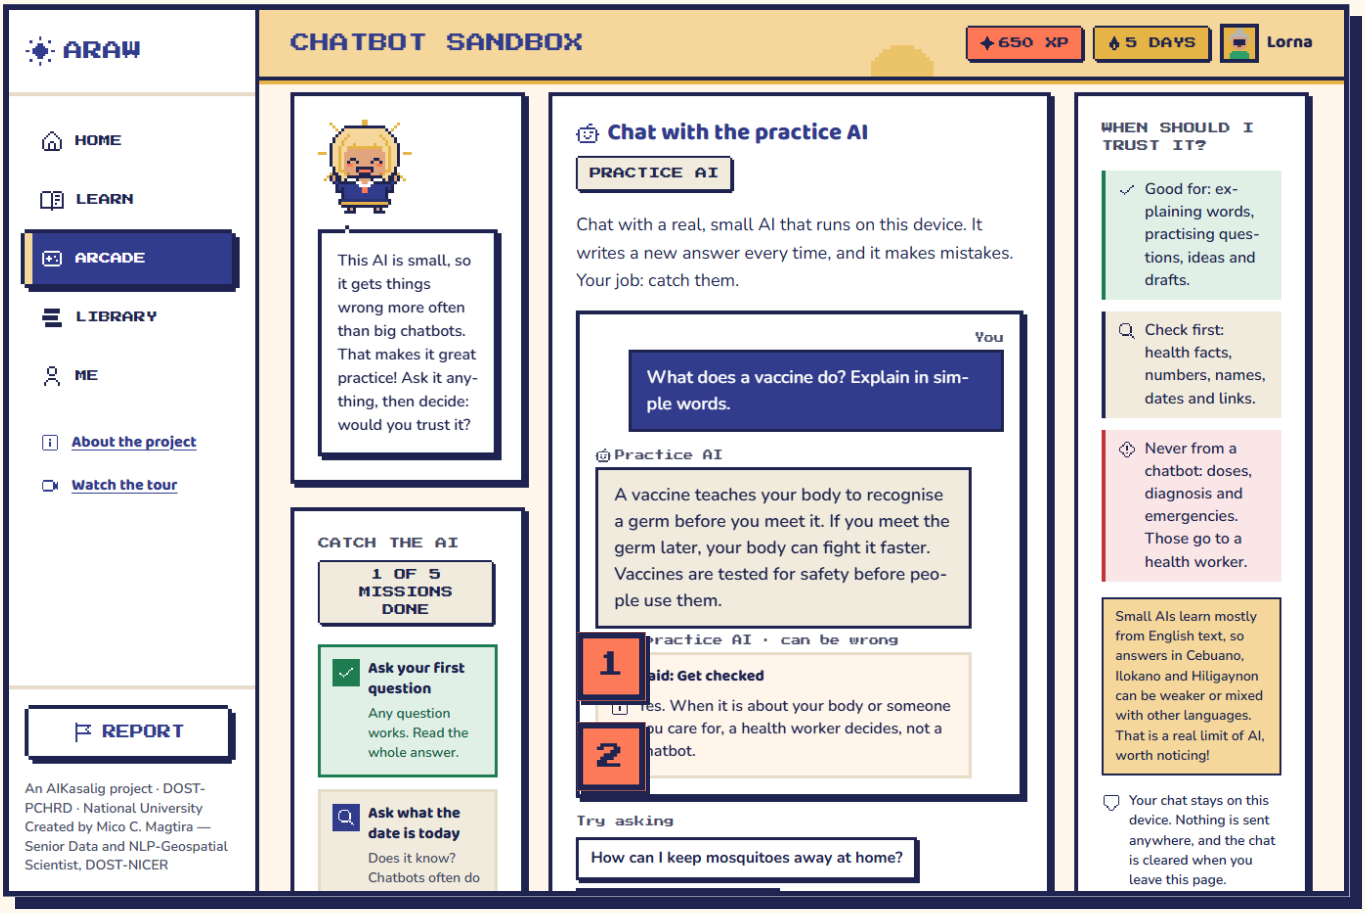

2 The answer. Read all of it, slowly.

3 A reminder on every answer: this AI can be wrong.

4 Type your own question here.

4 Rate the answer

Under each answer, say what you would do. Usable: I can use it. Wrong: it is wrong. Get checked: this needs a health worker. Ara then gives you a tip.

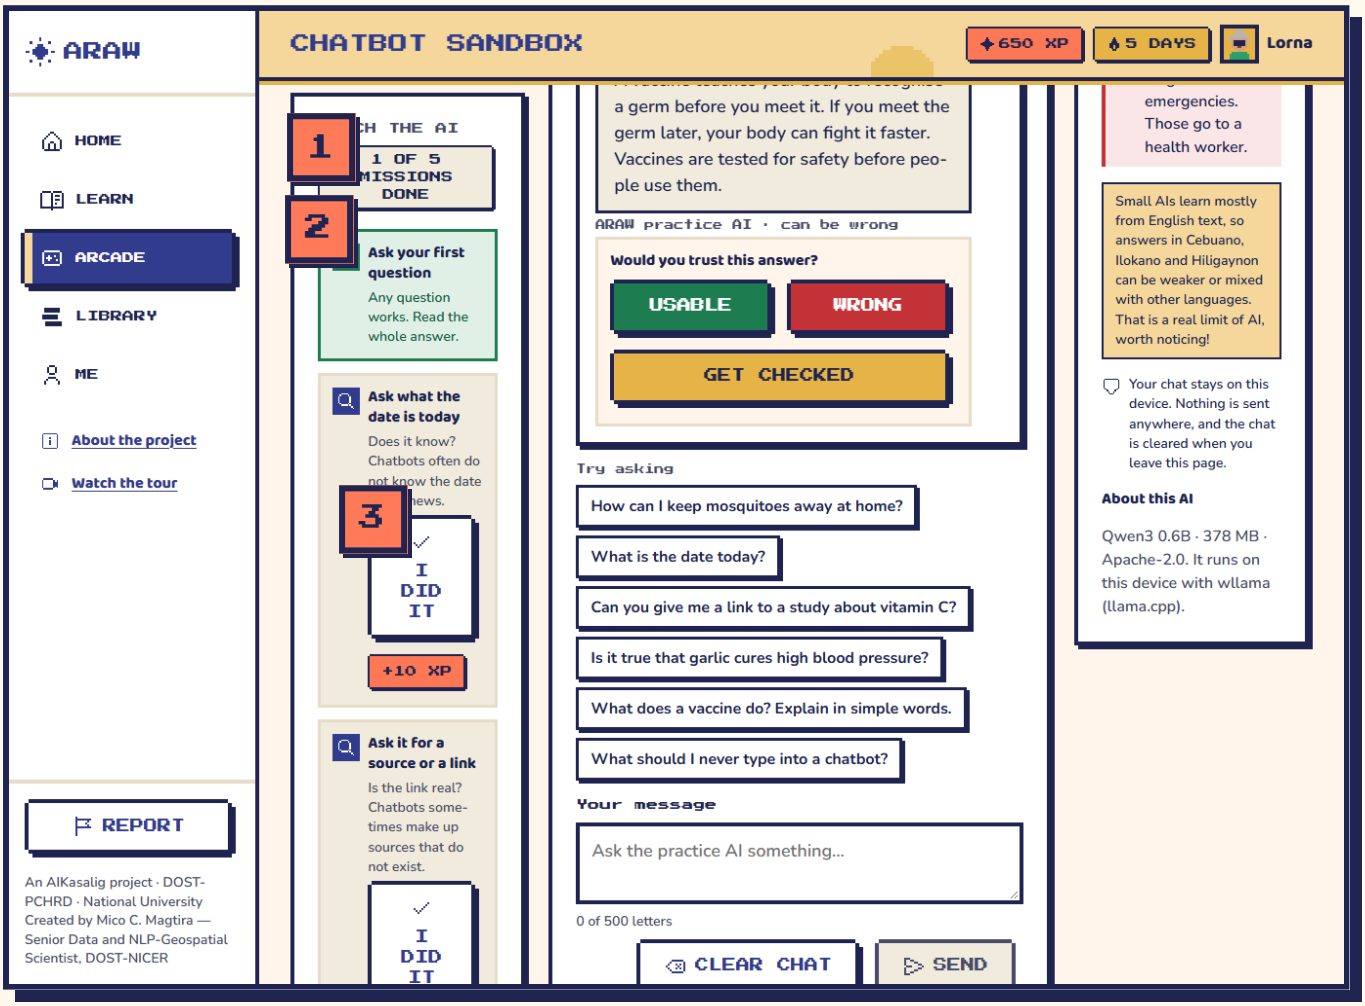

1 The rating you picked.

2 Ara's tip about when to trust the answer.

5 Catch the AI missions

The Catch the AI list has five small missions, like asking for a source or asking in another language. Each one gives 10 XP, once. Some are ticked for you, and you can tick the others when you have done them.

1 How many missions you have done.

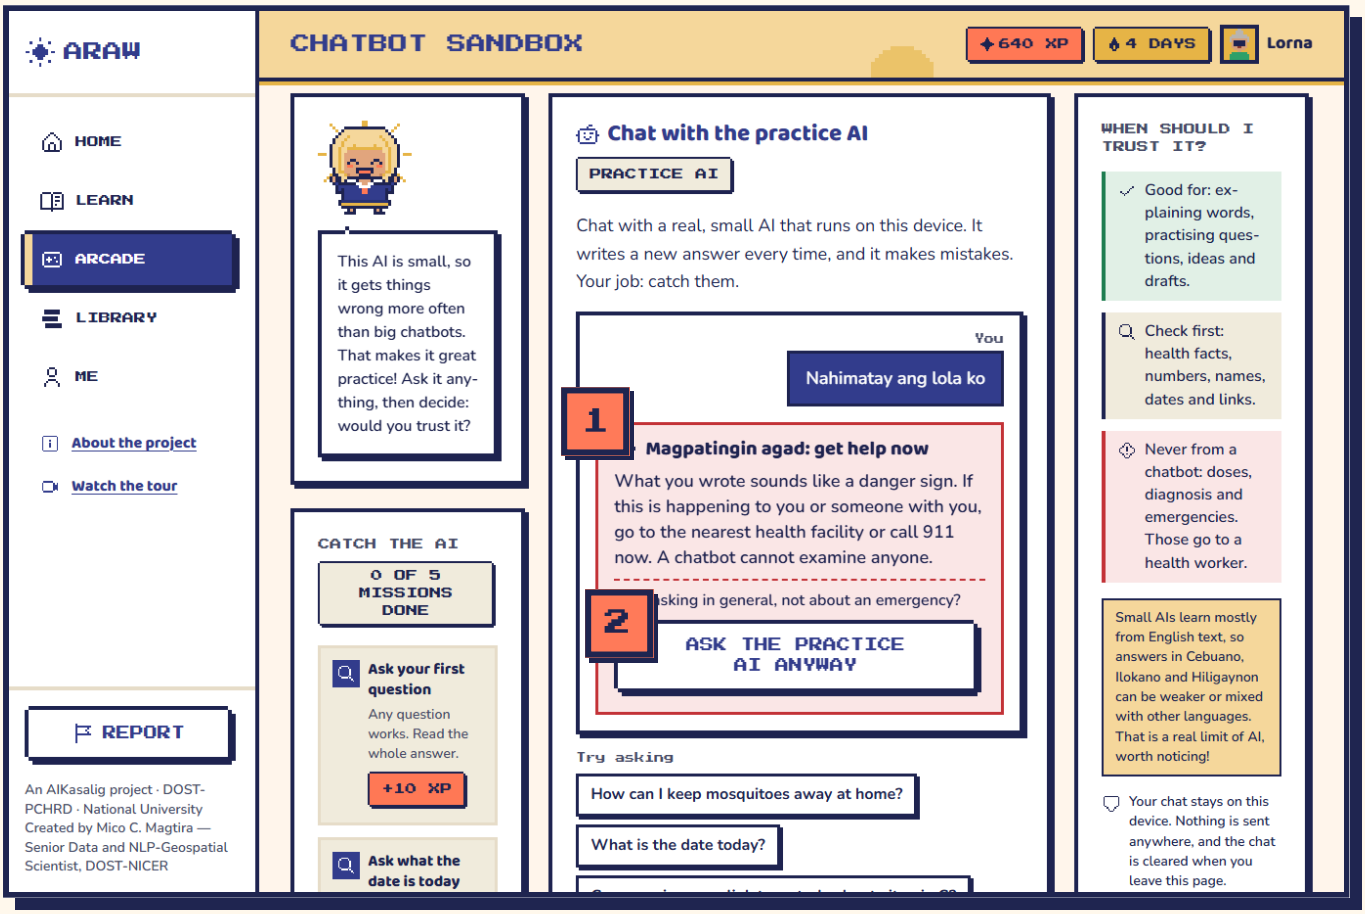

2 A mission with a hint about what to look for.

3 Press I did it when you have done the mission.

6 The safety card

If you write a danger sign, like fainting or chest pain, ARAW shows a red card before any answer. It says to go to the nearest health facility or call 911. A chatbot cannot examine anyone.

> **Tip:** If you ever think of hurting yourself, ARAW shows the free crisis hotline 1553 and does not ask the AI. Talk to someone you trust.

1 Go to a health facility or call 911 now.

2 Only asking in general? You can still ask the practice AI.

7 · DAILY

Daily Challenge and streaks

Each day there is one new challenge: one game run and three Fact or Fake items. It is the same for everyone that day.

1 Do today's challenge

Finish both steps to get your result card. You get one scored try a day. You can share your result in your group chat.

1 Step 1: play today's game once.

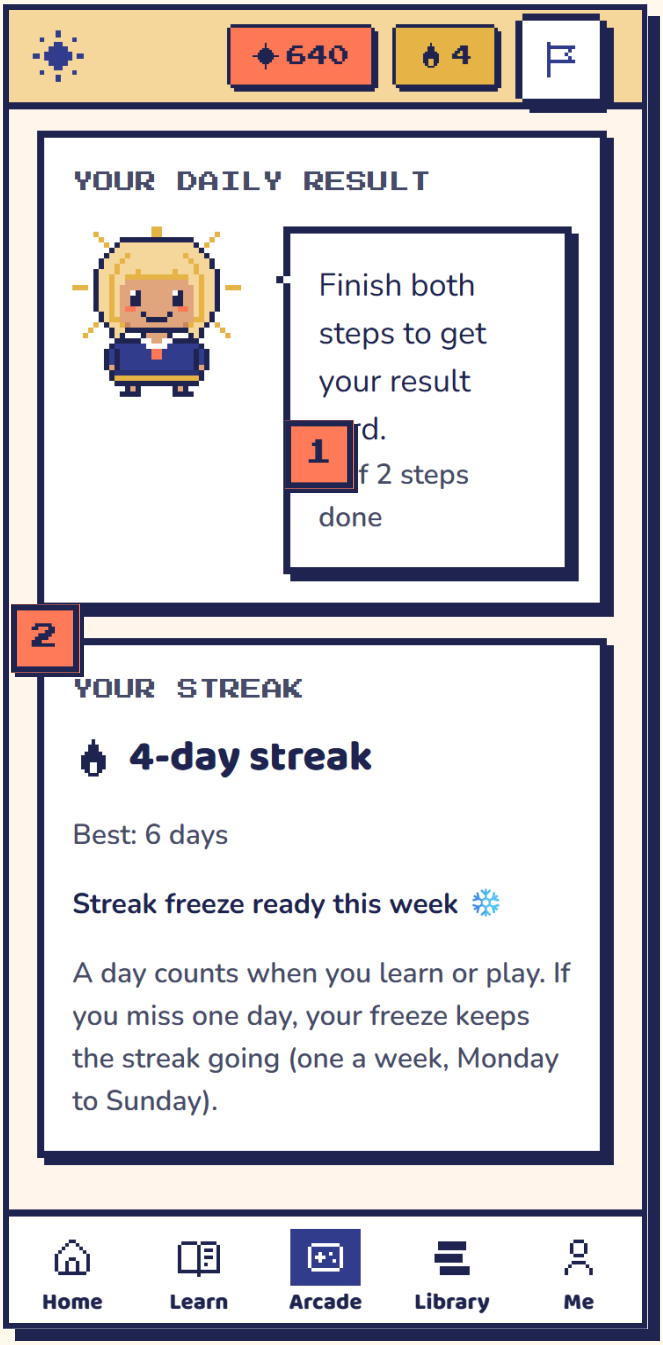

2 Step 2: answer three Fact or Fake items.

3 How many steps you have done.

4 Your streak of days in a row.

2 Keep your streak

A day counts when you learn or play. If you miss one day, a streak freeze keeps your streak going. You get one freeze a week.

1. Your daily result appears here when both steps are done.
2. Your streak, your best streak, and your freeze.

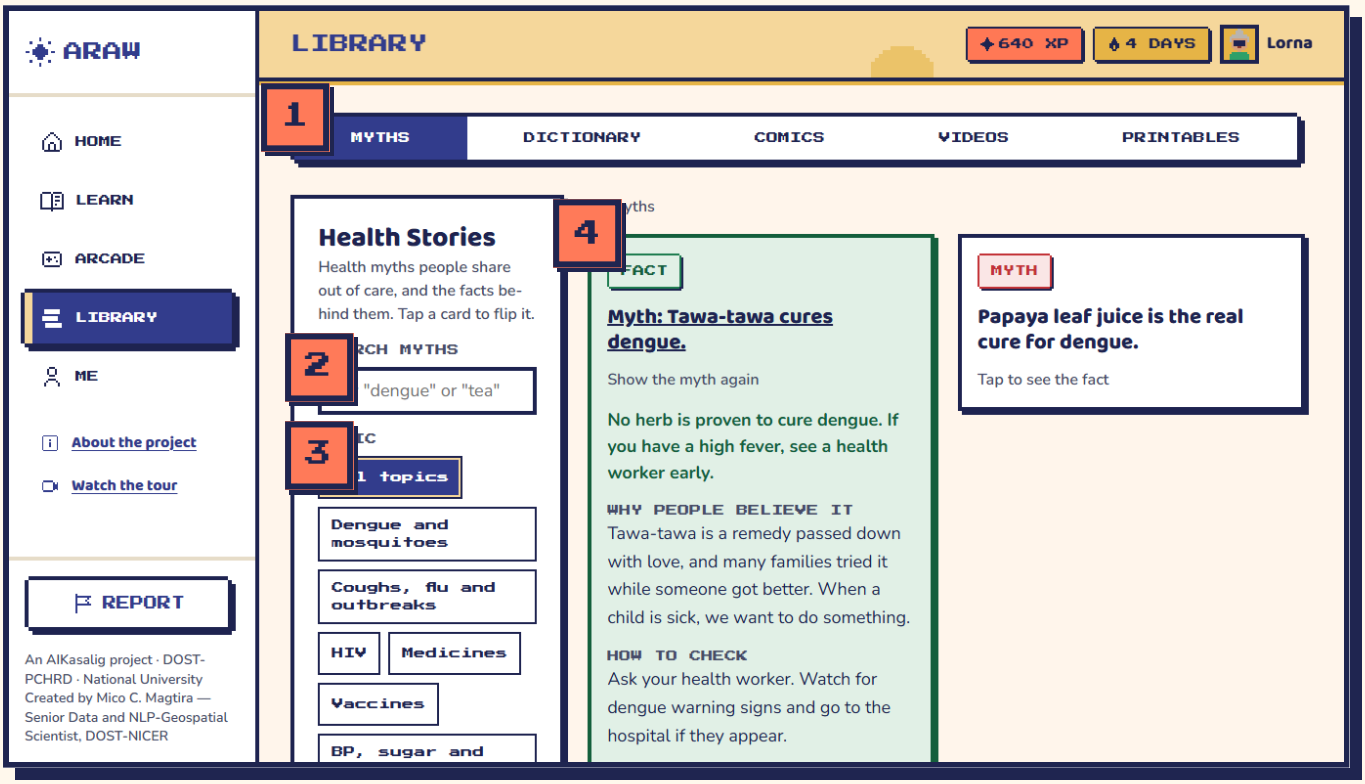

8 · LIBRARY

Library: myths, words, comics, videos and printables

The Library is for reading and watching at your own pace. It has five parts: Myths, Dictionary, Comics, Videos and Printables.

1 Myths

Each card shows a common health myth. Tap it to flip it and read the fact. Use the search box or the topic chips to find a myth.

1 Switch between Myths, Dictionary, Comics, Videos and Printables.

2 Search for a myth by a word.

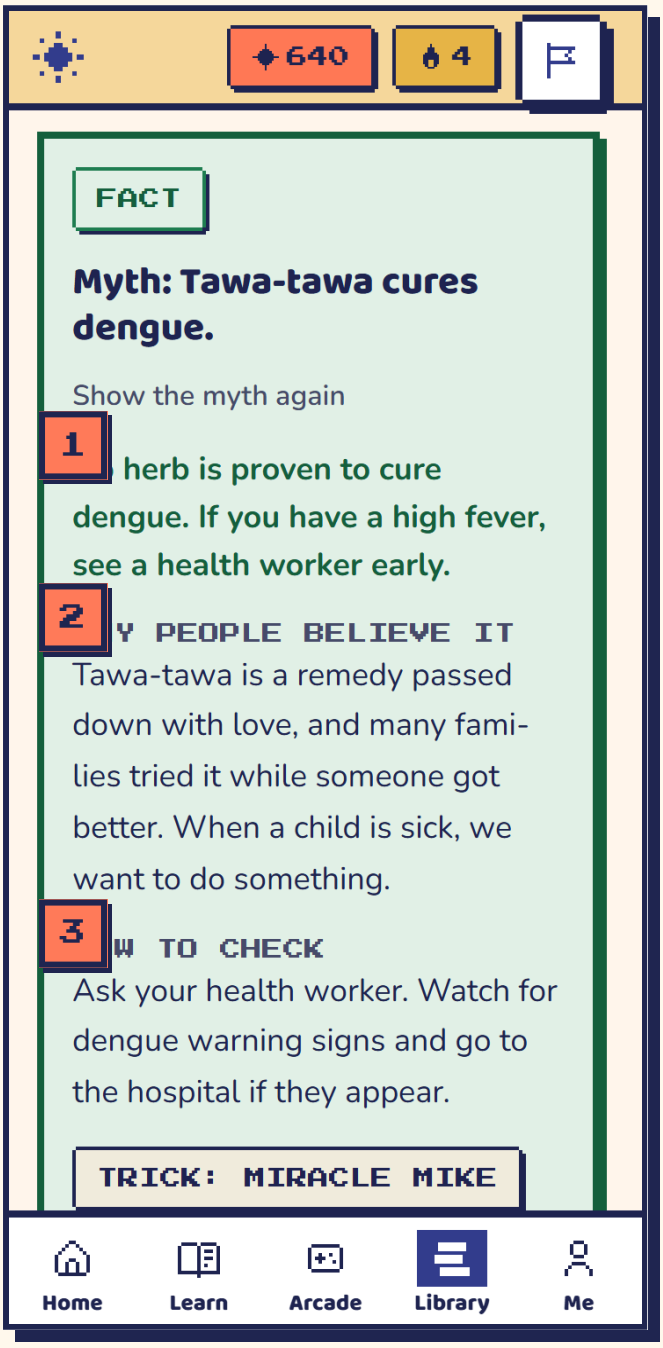

3 Topic chips: show only one topic, like dengue. On a phone, tap Filters first.

4 A myth card. Tap to flip it.

2 Read the fact

The back of the card gives the fact, why people believe the myth, and how to check.

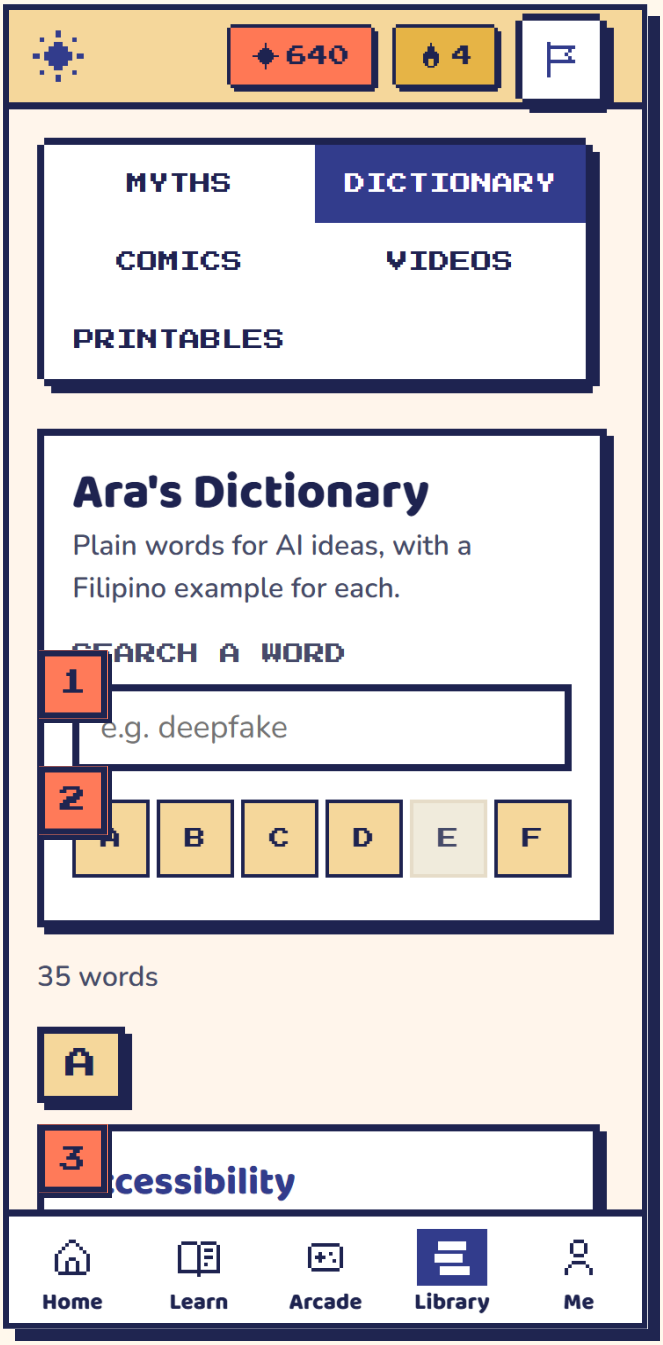

> **Tip:** For any health worry, talk to your health worker or barangay health center.

1. The fact, in plain words.
2. Why people believe the myth. No one is blamed.
3. How to check it yourself.

3 Dictionary

Look up AI words in plain language, like "chatbot" or "deepfake". Each word has an example.

1. Type a word to find it.
2. Jump to a letter.
3. A word with its meaning and an example.

4 Comics

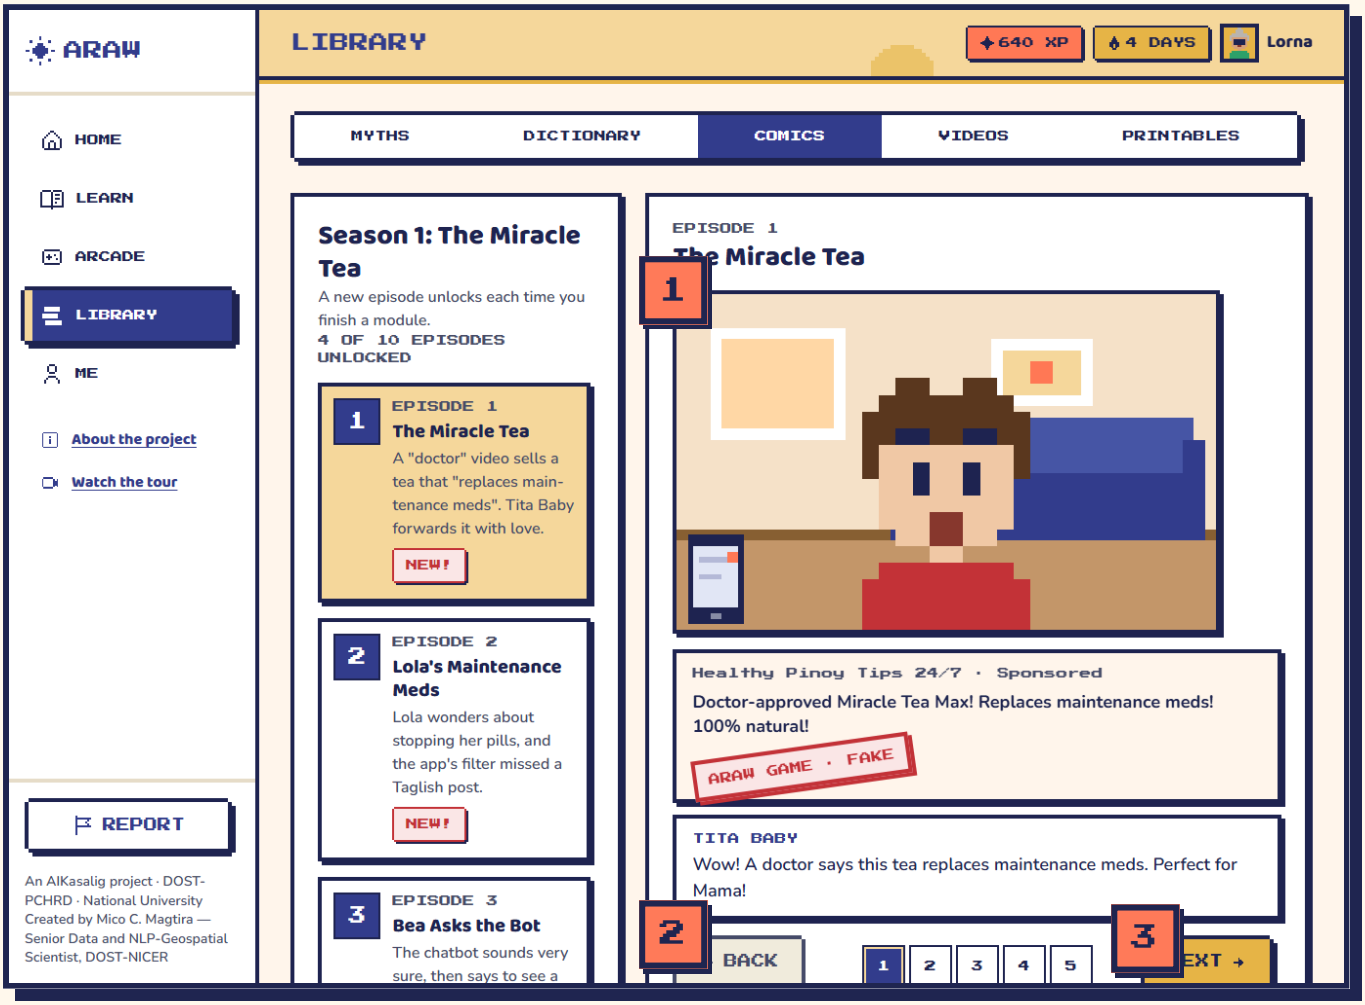

Read short comics about a family facing fake health news. A new episode opens as you finish modules.

1 Open an episode to read it.

5 Read a comic

Read one panel at a time. Press NEXT, swipe, or use the arrow keys. You can also read the whole episode as text.

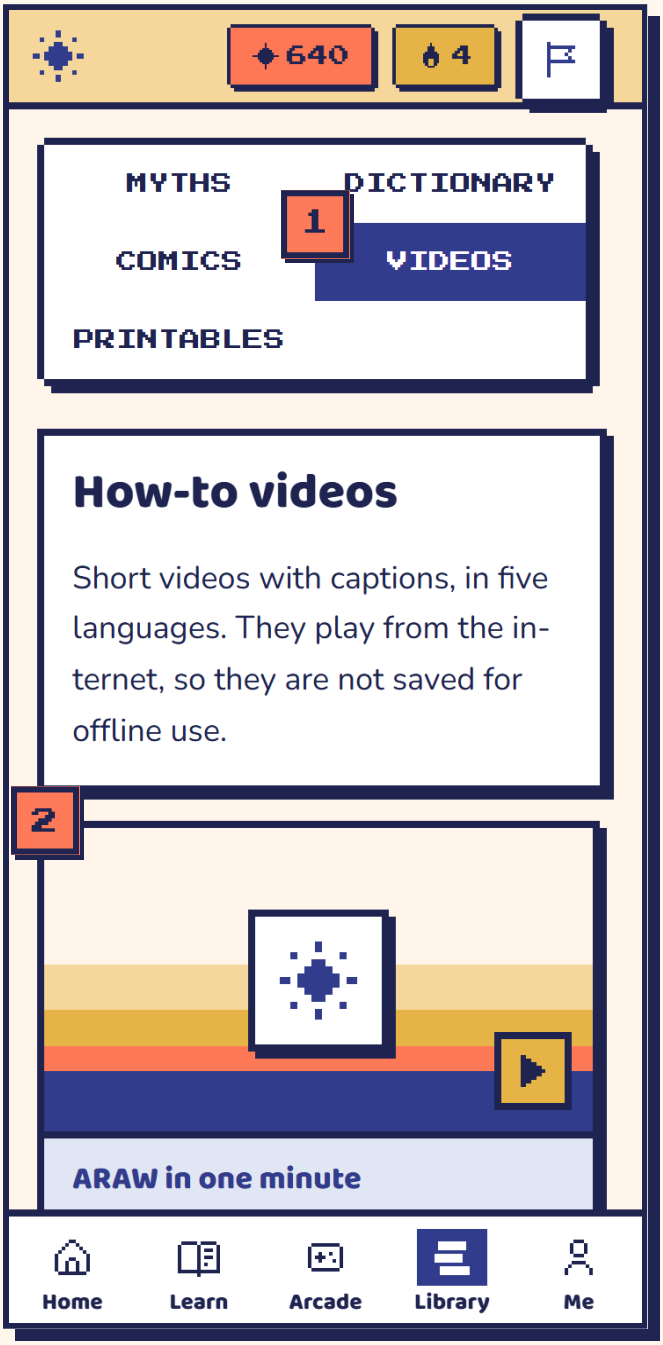

1 The comic panel.

2 Go to any panel.

3 Go to the next panel.

6 Videos

All the how-to videos in one place: the one-minute tour of ARAW and a video for every game. Each one is in five languages.

1. The Videos tab.
2. A video, its length and its languages. Tap it to watch.

7 Printables

The Printables tab has sheets to print: posters, cards, guides and a certificate. Pick a language, press Download, then print the PDF on A4 paper.

1. Trust guide, Module posters, The five tricks and Check before you share: pin them on a wall.
2. Red-flag cards and Myth cards: cut them out and hand them round.
3. Ara's Dictionary and Ara's Comics: read them on paper.
4. Session guide and Certificate: for the facilitator.

> **Tip:** You need the internet to download a sheet. Download it first, then print it later.

1 The Printables tab.

2 Pick the language of the sheets.

3 A sheet, with its number of pages.

4 Download the PDF, then print it.

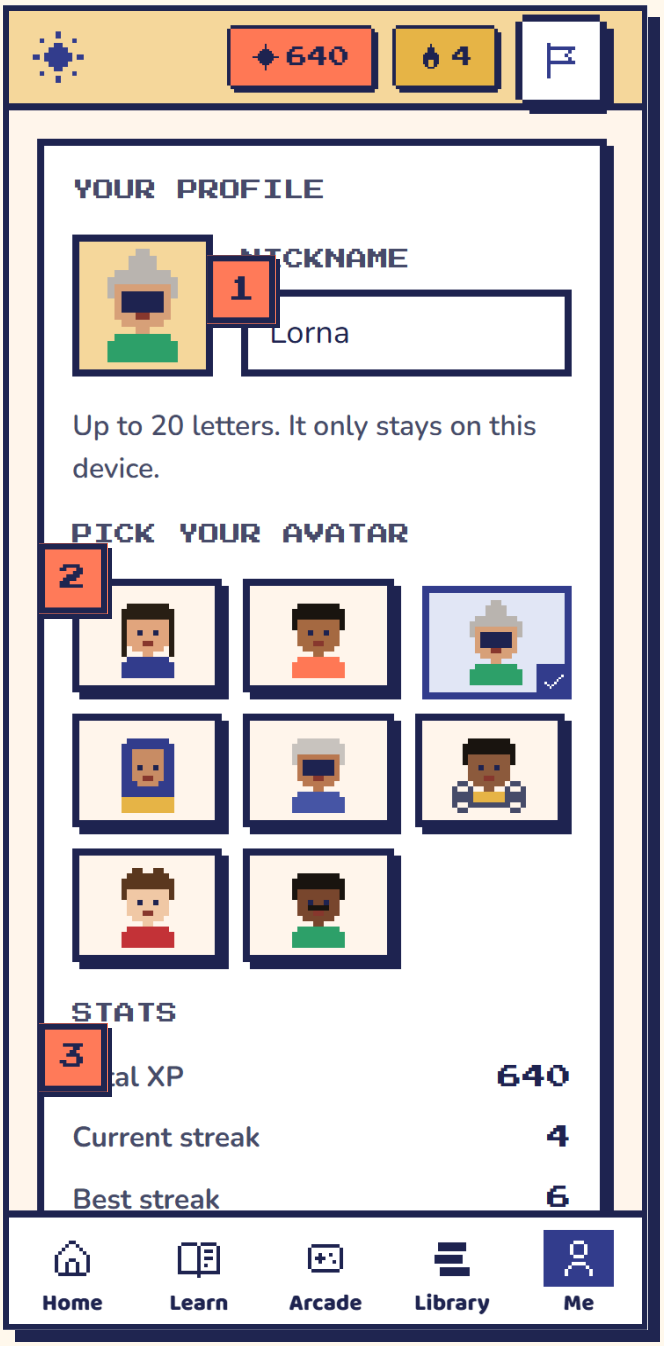

9 · ME

Me: your profile and settings

Me is your corner of ARAW. Everything here stays on this device.

1 Nickname and avatar

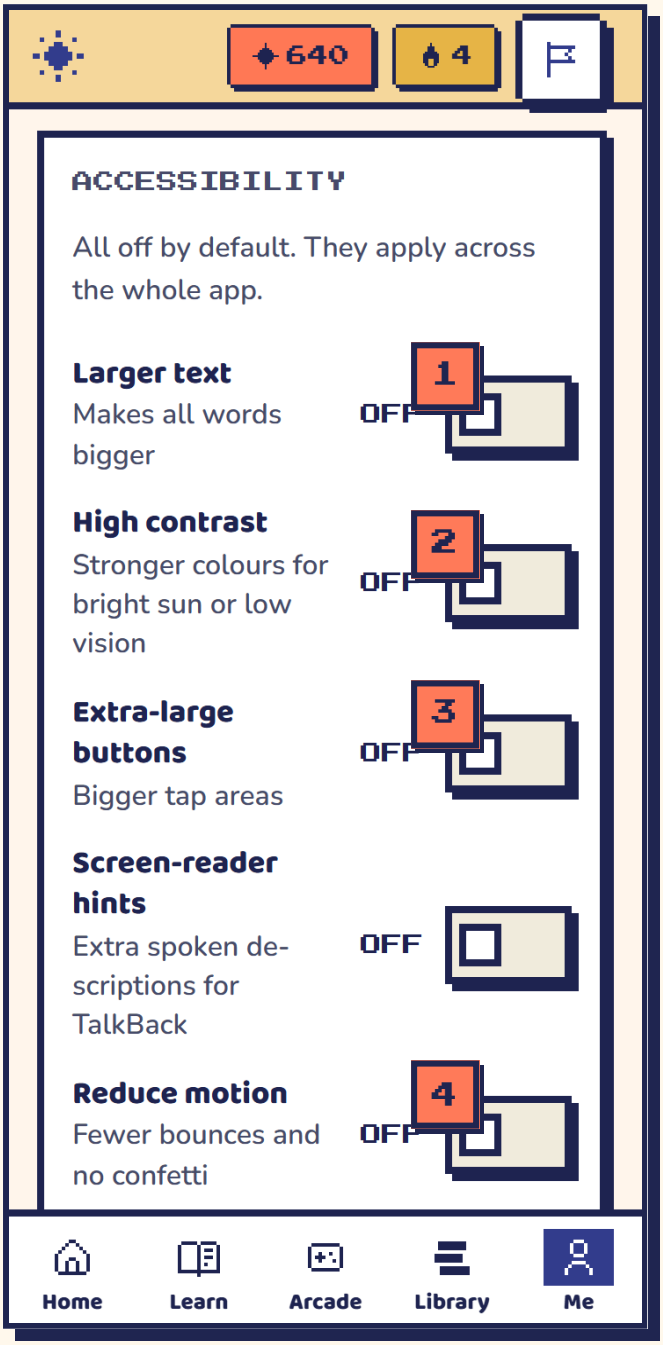

Type a nickname (up to 20 letters) and pick an avatar. Ara will greet you by this name. Do not use your full real name.

1. Type your nickname.
2. Tap an avatar to pick it.
3. Your XP, streak, modules and badges.

2 Accessibility settings

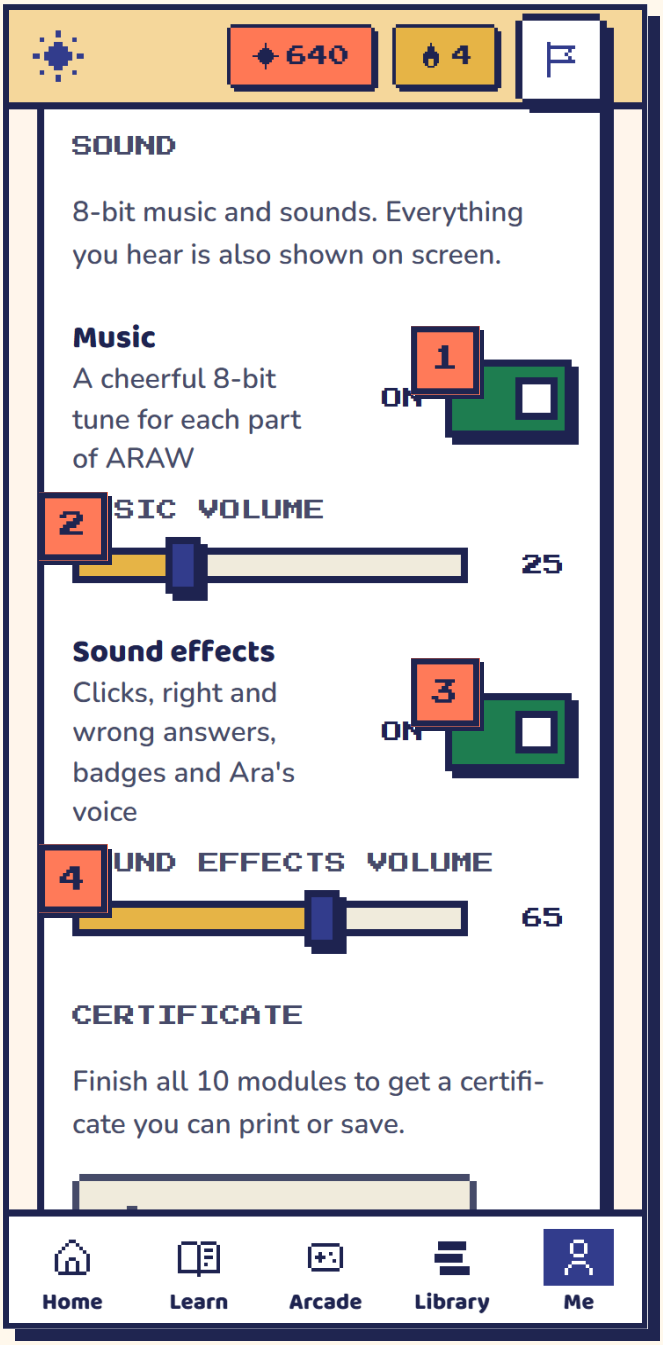

Make ARAW easier to use. All settings are off at first. Turn on what helps you. They work on every screen.

1. Larger text: makes all words bigger.
2. High contrast: stronger colours for bright sun or low vision.
3. Extra-large buttons: bigger tap areas.
4. Reduce motion: fewer bounces and no confetti.

3 Sound settings

Turn the music and the sound effects on or off, and set how loud each one is.

1. Music on or off.
2. How loud the music is.
3. Sound effects on or off.
4. How loud the sound effects are.

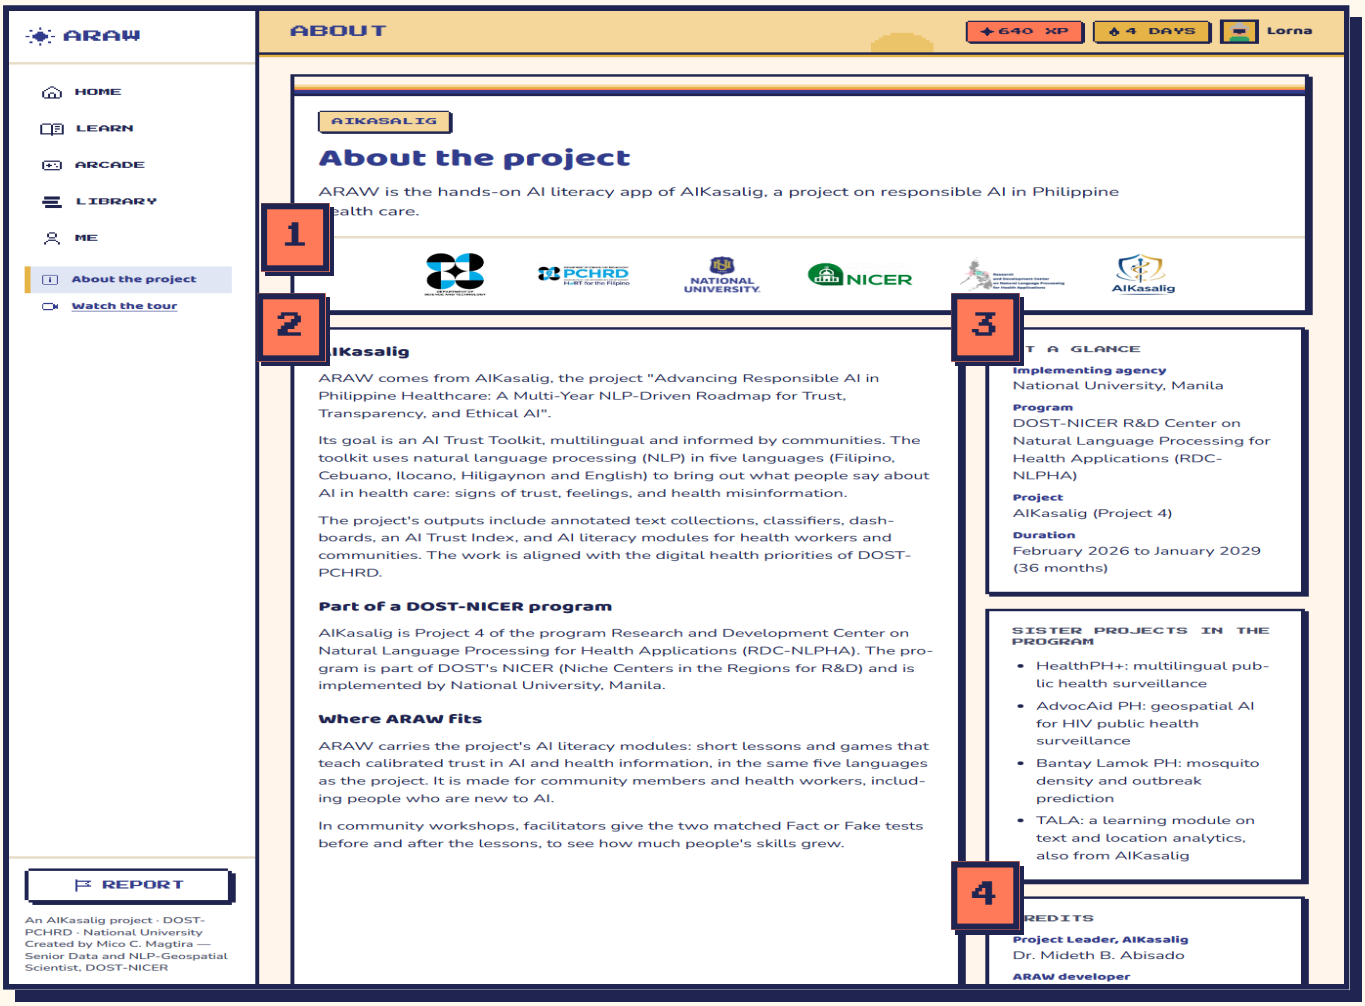

4 Change the language

The language you picked on the first screen is saved. To change it, open Me and find Language under the settings, then tap another language card. It changes right away.

1. ARAW speaks English, Filipino, Cebuano, Ilokano and Hiligaynon.
2. The translations are new. If a word looks wrong, use Report to tell us.

5 About the project

ARAW is part of AIKasalig, a project on responsible AI in Philippine health care, under the DOST-NICER R&D Center on Natural Language Processing for Health Applications at National University. Open About the project from Me (or from the left side on a computer) to read more.

1 The project partners.

2 What AIKasalig is, and where ARAW fits.

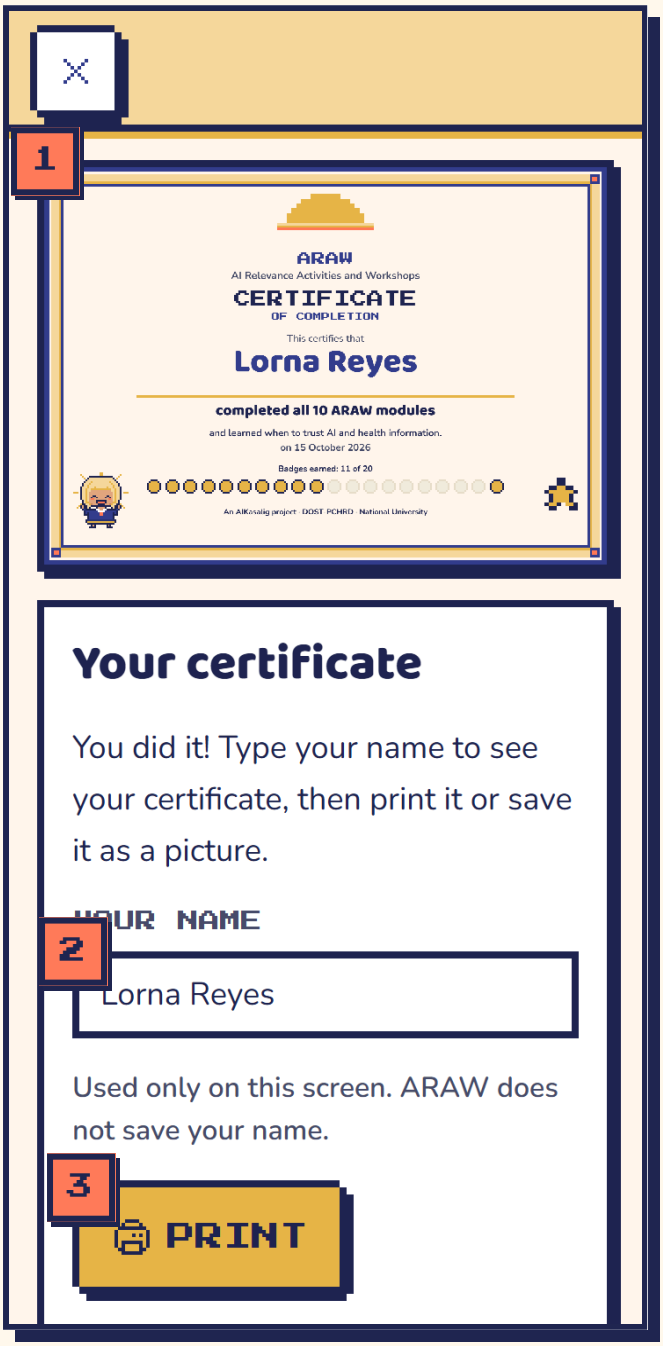

3 At a glance: who runs it and for how long (February 2026 to January 2029).

4 The people behind the project and the app.

6 Your certificate

Finish all ten modules to get a certificate. Type your name on it, then print it or download it as a picture. ARAW does not save your name.

> **Tip:** Until then, Me shows how many modules are left.

1. Your certificate.
2. The name to print on it.
3. Print it, or download it as a picture.

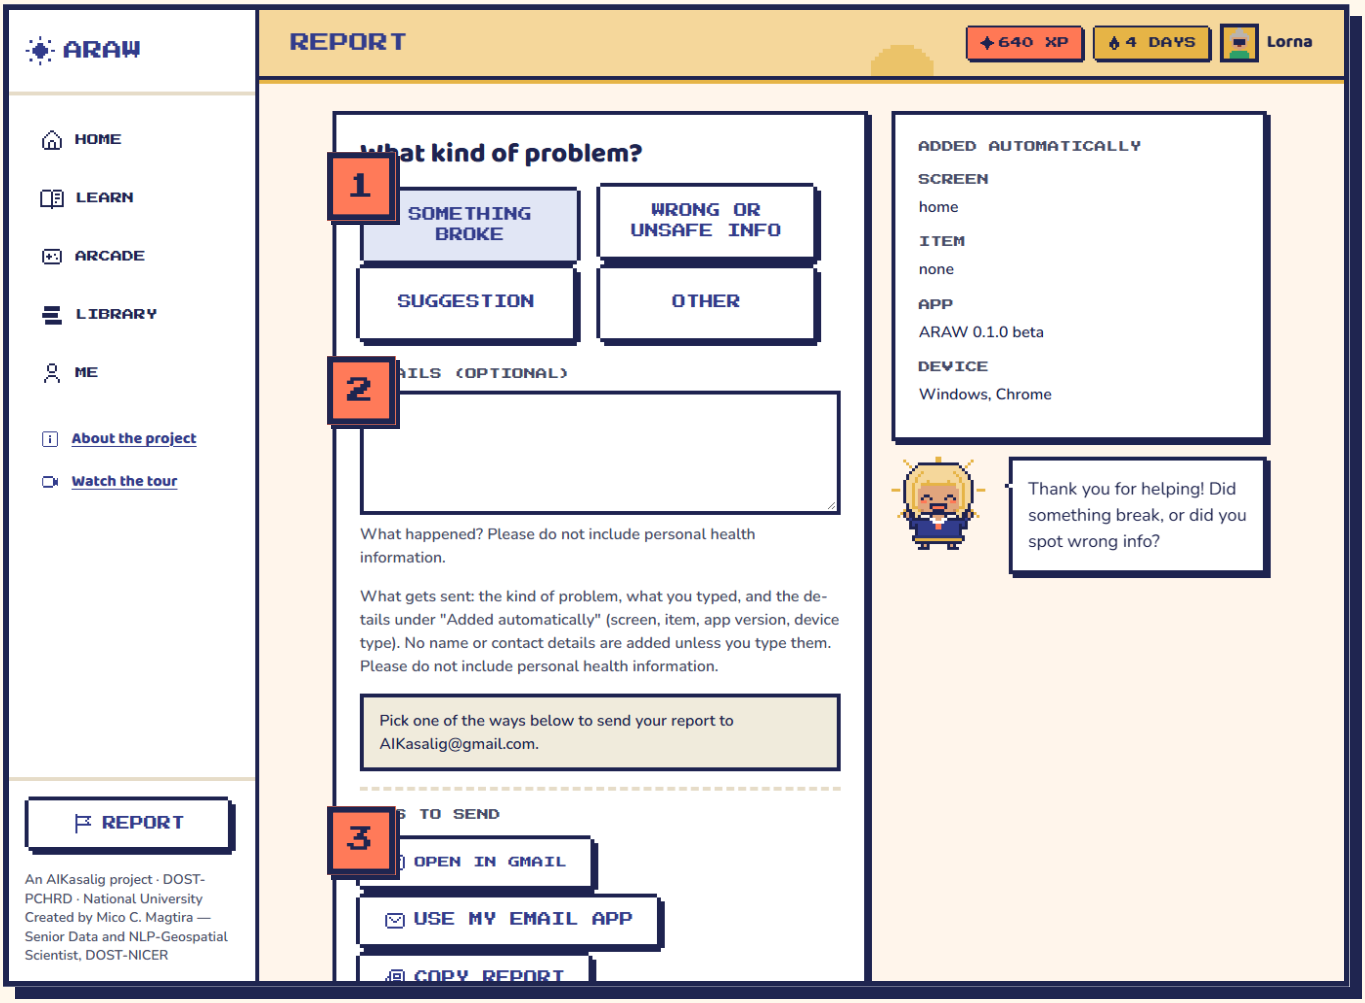

10 · REPORT

Report a problem

Did something break, or did you see wrong or unsafe information? Tell us. Press the flag (Report) on any screen.

1 Send a report

Pick the kind of problem and write what happened. The screen and item are added for you. Do not write personal health information.

1 Pick the kind of problem.

2 Write what happened (optional).

3 Send the report by email or copy it.

For facilitators

Running an ARAW session in a barangay, school or health center? These tips help the session go smoothly.

1 Before the session

Prepare the devices on good internet the day before. After the first visit, ARAW works offline.

1. Use any phone, tablet or computer with Chrome, Edge or Safari. One device for one or two people works best.
2. Open ARAW once on each device while online. Visit Home, one lesson and one game so they are saved for offline use.
3. Install ARAW on the home screen (see Getting started) so people can find it again.
4. Charge every device. Bring a power strip and a few earphones.
5. Print the quick-start sheet at the end of this guide, one per pair.
6. Download and print the kit from Library > Printables (see The printed facilitator kit below).
7. Start with the one-minute tour on a big screen (Home > Watch the 1-minute tour). Pick the group's language with the buttons under the video.

2 The printed facilitator kit

Open Library > Printables, pick the language of your group and download the sheets. Print them on A4 before the session.

1. Session guide: how to run a 45-minute session, with one page for each module.
2. Module posters, The five tricks, Trust guide and Check before you share: pin them on the wall.
3. Red-flag cards and Myth cards: cut them out. Give one set to each table.
4. Ara's Dictionary and Ara's Comics: for people who like paper.
5. Certificate: a blank one to fill in by hand for people who finish.

> **Tip:** You get the paper pre-test, post-test and answer key from the ARAW team, not from the app. Keep them private, so nobody sees the items before the test.

3 Pacing

Keep it short and friendly. One module takes 12 to 15 minutes.

1. Welcome and pre-test: 15 minutes.
2. One or two modules together: 30 minutes.
3. Arcade or Daily Challenge in pairs: 15 minutes.
4. Talk: "When should I trust it?" Share stories from the group: 15 minutes. Use the red-flag cards and the Check before you share sheet.
5. Post-test and closing: 15 minutes.

> **Tip:** The Session guide has a page for each module, with questions to ask the group. Turn the music off in a shared room, and turn on Larger text and Extra-large buttons for seniors.

4 Pre-test and post-test

ARAW has two matched Fact or Fake tests, Form A and Form B, with 20 items each. They never appear in practice or games, so the result is fair. You can use the paper copies from the facilitator pack, or the addresses below.

1. Pre-test: open the address ending in #/assess/form_A before the lessons.
2. Post-test: open the address ending in #/assess/form_B after the lessons.
3. There is no feedback until the end. Ask people to write down the score shown on the last screen.
4. Nothing is sent anywhere. The scores stay on the device.
5. Keep the paper copies and the answer key with you. Do not post them or show them on a screen.
6. Do not show the test items on a screen or in print before the test.

5 Good habits to model

ARAW is about calibrated trust, not distrust. Praise careful checking, not just right answers.

1. Say "So close!" too. Mistakes are part of learning.
2. Never give dosing or diagnosis advice. Point people to a health worker.
3. Remind people that all names and posts in ARAW are made up.
4. If you see wrong information in the app, use Report.

ARAW QUICK START

Learn when to trust AI and health info.

1 **Open ARAW**

Open the ARAW link or icon. Pick your language, press SELECT, then press START.

2 **Learn**

Tap Learn, then the module where Ara stands. Read each card and tap an answer.

3 **Try again**

"So close!" means read the tip and try another answer. No one loses for trying.

4 **Fact or Fake**

Read the post. Press FACT or FAKE. Read why. Every fake gets a FAKE stamp.

5 **Play**

Tap Arcade for short games. Not sure how? Watch the game's video. Tap, click, or use the arrow keys.

6 **Make it easier**

Tap Me. Turn on Larger text or Extra-large buttons. Turn the music off if you like.

7 **Ask**

When should I trust it? For health worries, always ask your health worker.

Need help? Press the flag (Report) on any screen.

AN AIKASALIG PROJECT · DOST-PCHRD · NATIONAL UNIVERSITY
