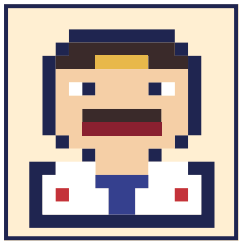
TRICKS OF HEALTH MISINFORMATION



1

DR. FAKE

Fake expert or deepfaked doctor

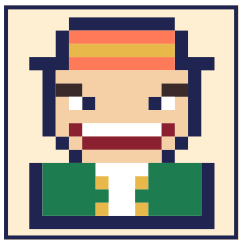
"Trust me, I'm a doctor!"

Watch for

- A "doctor" selling a product
- The video lives only on a sales page
- No official page confirms it
- The lab coat is a costume

What to do

Look for the expert's own official page and the product's FDA registration.



2

MIRACLE MIKE

Miracle cure, "natural is always safe"

"Cures everything, 100% natural!"

Watch for

- Cures many diseases at once
- "No side effects"
- "Replaces your medicine"
- Before-and-after photos

What to do

Ask: is it registered? Is it proven? What does my health worker say? Natural does not mean safe.

3

FEAR MONGER

Scary language and false urgency

"SHARE BEFORE IT'S DELETED!!!"

Watch for

- ALL CAPS and many "!!!"
- Countdowns and "share now"
- "Your family is in danger"

What to do

Pause. A strong feeling is the time to check, not the time to share.

TRICKS OF HEALTH MISINFORMATION

4

CONSPIRACY KUYA

"They are hiding the truth"

"Doctors don't want you to know this!"

Watch for

- Secret plots and "mainstream lies"
- No source you can check
- Any proof against it is "part of the cover-up"

What to do

Ask who gains and where the evidence is. Check independent sources.

5

KWENTO KIM

One story in place of evidence

"It worked for my neighbour!"

Watch for

- A single story
- Testimonials and "my friend's cousin"
- Nothing to compare with

What to do

One story is not proof. Look for what studies and health workers say.
