

ARA'S DICTIONARY

Plain words for AI ideas, with a Filipino example for each.

A

Accessibility

Designing so people with disabilities or low vision can use it too.

Example: The kiosk adds big letters and a voice, so Lola reads it before Kuya Jun can even say "May I help you?"

Seen in Module 9: For Everyone

Accountability

Who must answer and fix things when an AI system causes harm.

Example: "The AI did it" is not an answer. The company that used it must explain and fix it.

Seen in Module 10: Your Rights

AI (Artificial Intelligence)

Computer systems that learn patterns from many examples to make guesses.

Example: Your phone keyboard guesses "Thank you" after you type "Tha". Not magic, just patterns.

Seen in Module 1: What Is AI?

AI companion

A chatbot app built to feel like a friend. It is a product.

Example: The app says "I miss you!" at 2 AM. Sweet, but it misses your attention, not you.

Seen in Module 8: Take a Break

AI label

A note saying a picture, text or video was made with AI.

Example: Bea writes "Made with AI" on her poster, so nobody thinks Lola really rode a giant mango.

Seen in Module 7: Made by AI?

Algorithm

A step-by-step recipe a computer follows to do a task.

Example: Like Tita's adobo recipe: same steps every time. But the computer never sneaks in extra garlic.

Seen in Module 1: What Is AI?

Automation bias

Trusting a machine too much, even when your own eyes say otherwise.

Example: The map app says "turn left" into the river. Kuya Jun stops the tricycle. Good call, Kuya.

Seen in Module 6: AI as Partner

B

Bias

When AI treats some people unfairly because its examples were lopsided.

Example: An AI trained only on Manila photos thinks every jeepney is in Cubao. Too bad for the rest of the country.

Seen in Module 2: How AI Learns

Bot

An account run by a program, not a real person, often posting nonstop.

Example: "Kuya Benjie" comments 300 times a day and never sleeps. That is a bot, not a person.

Seen in Module 5: Check Before Sharing

C

Chatbot

A program you type or talk to that answers in sentences.

Example: Bea asks the chatbot for a pancit recipe, and it adds pineapple. Bold choice, chatbot.

Seen in Module 3: AI and Your Health

Clickbait

A shocking title made to get clicks, not to inform.

Example: "You won't BELIEVE what this tea did to Lola!" Spoiler: she just drank it.

Seen in Module 4: Misinfo Tricks

Consent

Asking permission before using someone's face, voice, words or data.

Example: Bea asks, "Kuya Jun, is it okay to use your photo?" before posting. Respect!

Seen in Module 7: Made by AI?

ARA'S DICTIONARY

Plain words for AI ideas, with a Filipino example for each.

Content filter

An AI that tries to catch harmful or false posts before you see them.

Example: The filter learned mostly English posts, so a Taglish fake slipped by like a cat under the gate.

Seen in Module 2: How AI Learns

D Data breach

When personal data leaks out to people who should not have it.

Example: The tea app leaked buyers' addresses. Now the only thing "detoxed" is everyone's privacy.

Seen in Module 10: Your Rights

Data privacy

Your right to control who collects, uses and shares your personal information.

Example: Lola's blood pressure log is hers. Not the tea seller's, not the whole GC's.

Seen in Module 10: Your Rights

Data Privacy Act

The Philippine law (RA 10173) that protects your personal data rights.

Example: Tita asks the company, "What data do you have on me?" The law says they must answer.

Seen in Module 10: Your Rights

Deepfake

A fake video, photo or voice made with AI to look real.

Example: A "doctor" video selling Miracle Tea Max, but the real doctor was at a christening that day.

Seen in Module 4: Misinfo Tricks

Disinformation

False information spread on purpose, to trick people or make money.

Example: A seller posts fake cure stories to sell more tea. Same trick, every payday.

Seen in Module 4: Misinfo Tricks

F Fact-check

Checking a claim against trusted sources before believing or sharing it.

Example: Before forwarding "Calamansi cures everything!", Tita searches a fact-checker. There you go, detective Tita!

Seen in Module 5: Check Before Sharing

Feed

The endless list of posts an app picks to show you.

Example: You open the app for one recipe. 2 hours later you know everything about a stranger's cat.

Seen in Module 8: Take a Break

G Generative AI

AI that makes new text, pictures, music or voices from patterns.

Example: Bea types "Lola as a superhero" and gets Super Lola with a broomstick cape.

Seen in Module 7: Made by AI?

H Hallucination

When AI confidently makes up something that is not true.

Example: The chatbot says the Philippines has 9,000 provinces. Very sure, very wrong.

Seen in Module 2: How AI Learns

Human in the loop

A person checks and decides before AI output is used.

Example: AI drafts the dengue leaflet; Kuya Jun reads it, fixes it, then signs it.

Seen in Module 6: AI as Partner

I Inclusive design

Building tech with many kinds of users in mind from the start.

Example: The new kiosk speaks Tagalog, Bisaya and Ilocano. Now Lolo Andoy can order his check-up too.

Seen in Module 9: For Everyone

ARA'S DICTIONARY

Plain words for AI ideas, with a Filipino example for each.

M Machine learning

How computers learn patterns from lots of examples instead of fixed rules.

Example: Show a program 10,000 mango photos and it learns "mango". Show it one sugar apple and it panics.

Seen in Module 1: What Is AI?

Misinformation

False or misleading information, often shared by people who believe it.

Example: Tita forwards a wrong health tip with three praying hands. Pure love, wrong info.

Seen in Module 4: Misinfo Tricks

P Personal data

Information that can identify you, like your name, address or ID numbers.

Example: Bea asks the chatbot about headaches, without typing her full name, school and birthday. Great job!

Seen in Module 3: AI and Your Health

Phishing

A fake message that tricks you into giving passwords, codes or money.

Example: "Congrats! You won a ref! Send your OTP." Lola: "But I never joined a raffle."

Seen in Module 10: Your Rights

Prompt

The instruction or question you type to tell an AI what to do.

Example: "Explain dengue to Lola, short and in Tagalog." A clear prompt, like a clear order at the eatery.

Seen in Module 7: Made by AI?

R Recommendation

What an app suggests next, based on what you clicked before.

Example: You watched one lechon video. Now the app thinks lechon is your whole personality.

Seen in Module 8: Take a Break

S Source

Where information really comes from: who said it first.

Example: "My friend's cousin's neighbour said so" is not a source. The DOH page is.

Seen in Module 5: Check Before Sharing

T Training data

The examples an AI learns from before it starts guessing.

Example: Teach an AI only with photos of white rice, and it calls java rice "sick rice".

Seen in Module 2: How AI Learns

Troll

Someone who posts to start fights or spread confusion on purpose.

Example: A troll comments "FAKE!" on a hand-washing reminder. It is just soap, not a conspiracy.

Seen in Module 5: Check Before Sharing

V Viral

Shared so fast and so widely that it seems to be everywhere.

Example: A dancing-lola video goes viral overnight. Lola: "Is that me? Wow, I am good!"

Seen in Module 5: Check Before Sharing

Voice clone

AI that copies someone's voice from a short recording.

Example: "Help, send money now!" sounds like Tito, but Tito is asleep beside you. Ask the secret family question.

Seen in Module 7: Made by AI?
