

WHEN SHOULD I TRUST IT?

Scan the code to open ARAW on your phone.

1 What Is AI?

- Trust AI for low-stakes guesses, like traffic or spam, and double-check the ones that matter.

2 How AI Learns

- Trust AI more when it was trained on examples like your situation, your language and your community.

3 AI and Your Health

- Use chatbots to learn words and prepare questions, not to diagnose you or tell you a dose.

4 Misinfo Tricks

- Trust a post when the source checks out, other trusted sources agree and no trick is doing the work.

5 Check Before Sharing

- Trust a forward only after you paused, checked who said it, and found another trusted source.

6 AI as Partner

- Trust AI with repeat drafts you can check, such as counting, sorting, scheduling and first drafts.

7 Made by AI?

- Trust AI-made content that is labelled and checked by a person.

8 Take a Break

- Trust apps that respect your time, and set boundaries for the ones that do not.

9 For Everyone

- Trust tools that work for everyone you love.

10 Your Rights

- Trust services that tell you how they use your data.
